

Session 2
Discovering Value

Vision to Value

Instructor and Conversation Facilitator: Anjali Leon
Date: 07/16/2020

YOUR PROGRAM LEADER

Anjali Leon

Coach, Workshop Designer & Facilitator, Advisor, Speaker

- Founder and Principal Coach & Consultant at PPL Coach
- 10+ years as Agile Practitioner, Coach and Trainer
- Specialties: Value-driven and Values-based Product, People and Personal Leadership
- Founder of Empowering South Florida Women In Agile
- Clients include: Office Depot, Modernizing Medicine, Alpine ITW, Pearson, UVA, Optical Group, AJT Systems
- Worked with: Accuweather, HealthFirst, BCBS, Fannie Mae

*Co-Creator of the
PPL Agility and Resilience Navigator*

Program Objectives

1. Align a product vision and strategy to your organization's purpose and values.
2. Understand how your product creates value for your customers and business.
3. Define your organization's strategic outcomes and intent for win-6™ advantage.
4. Cascade an adaptive value-driven approach to all levels of the planning cycle.
5. Communicate strategies to accelerate time to market.
6. Influence stakeholders with customer-centric data-driven decisions.
7. Apply the Design Thinking framework to discover, define and validate value.
8. Validate and measure customer and business outcomes.
9. Understand your role and impact as a champion of value.

Session Name

Date

Time

1. Understanding and Championing Value

July 9, 2020

2:00pm –
6:00pm ET

2. Discovering Value through Empathy and Ideation

July 16, 2020

2:00pm –
6:00pm ET

3. Validating Value through Focused Experiments

July 23, 2020

2:00pm –
6:00pm ET

4. Planning and Communicating Strategic Intent

July 30, 2020

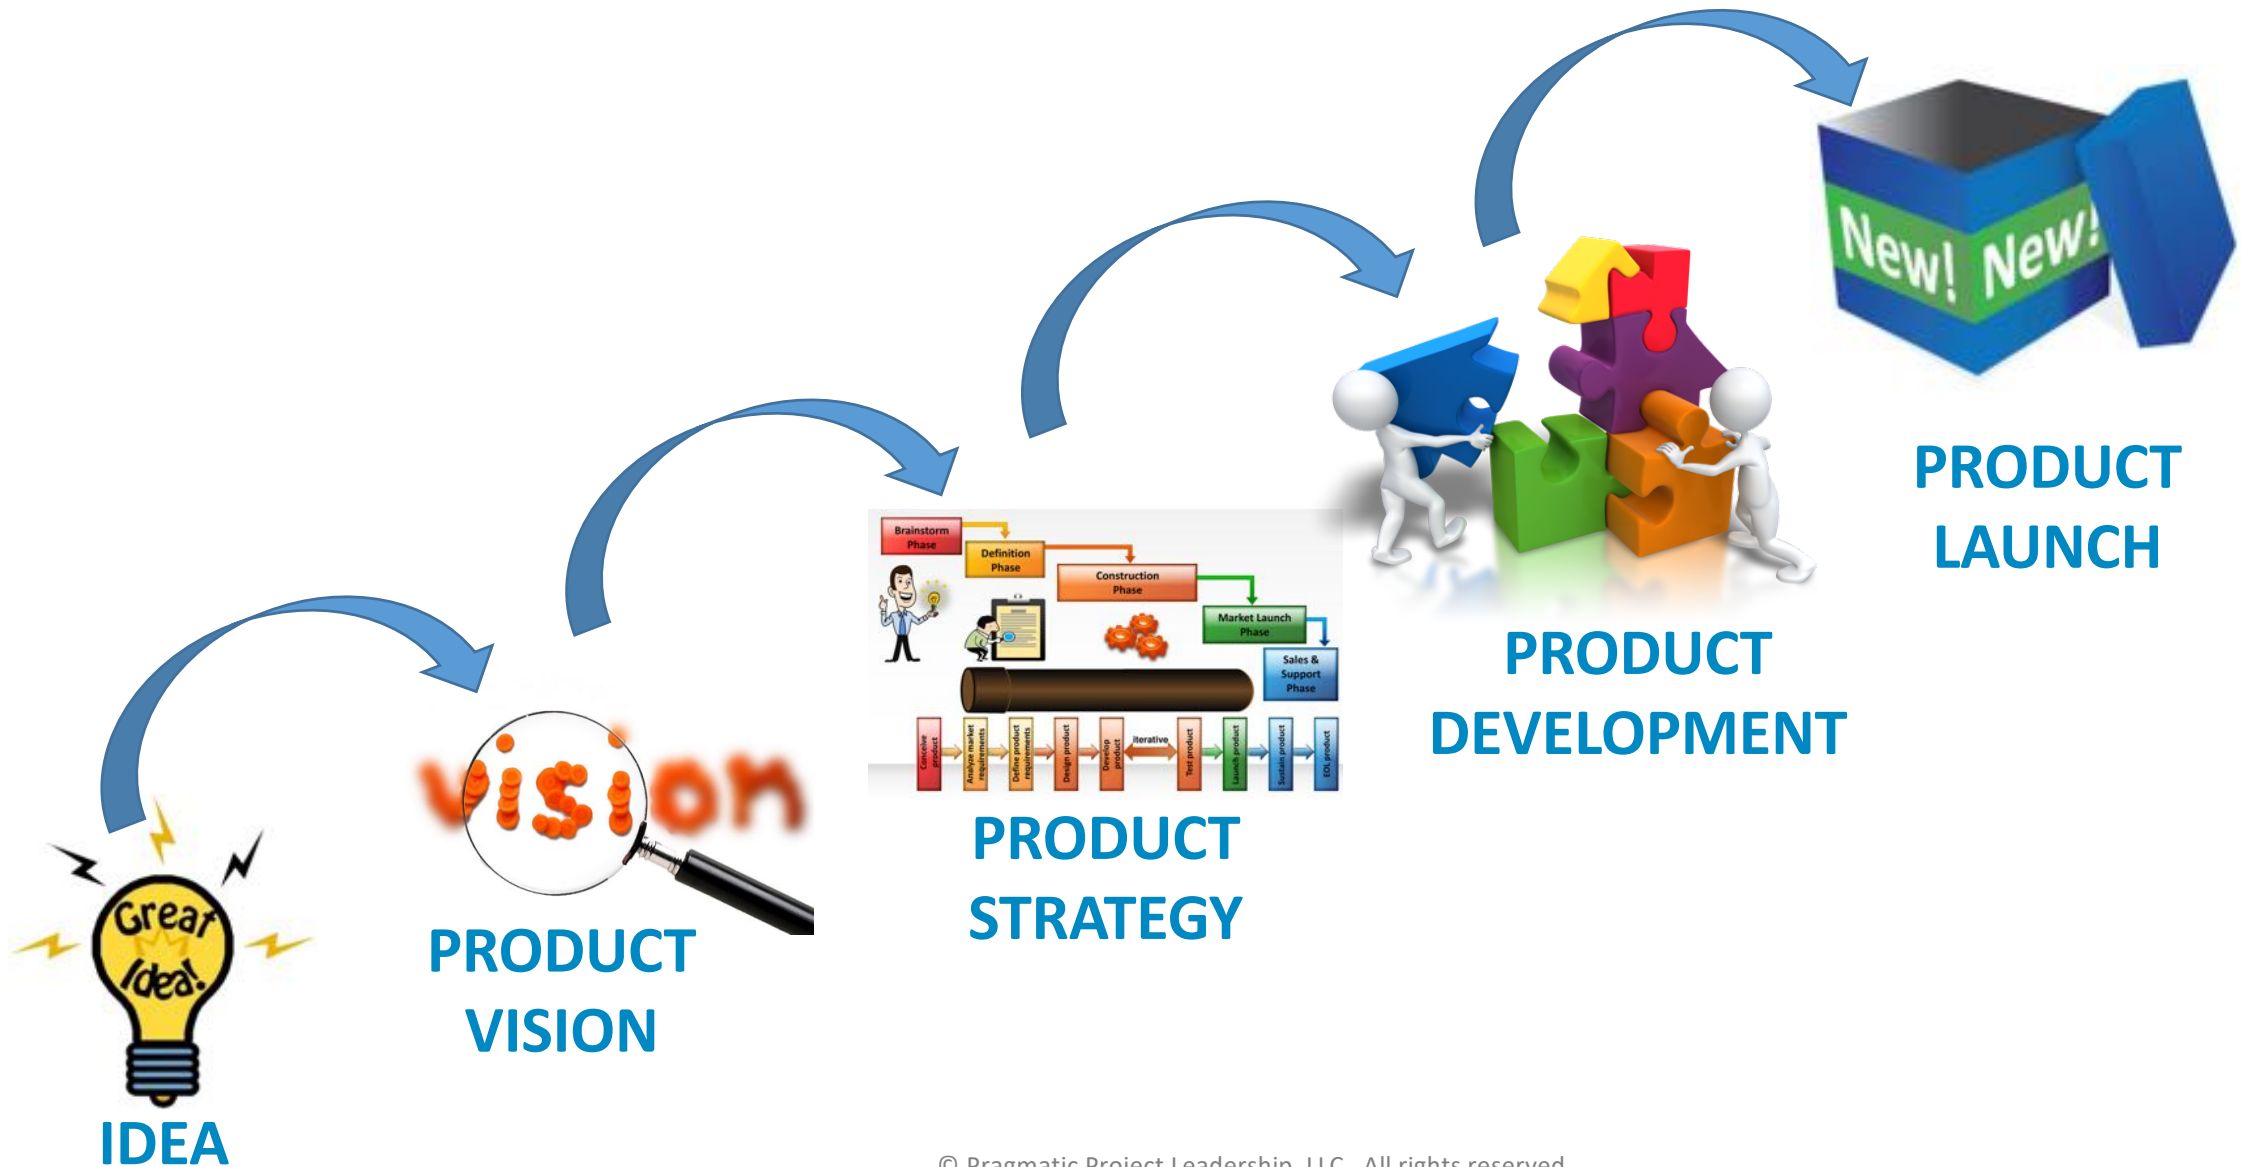

2:00pm –
6:00pm ET

Session Objectives

1. Understanding the role of Discovery and Design Thinking in Product Management
2. Practice identifying users and customer
3. Learn how to utilizing different empathizing techniques to connect with the customer
4. Learn techniques for ideating on potential solutions

Traditional Path from Idea to Product?

What is Wrong with this Model?

DELIGHT

DISAPPOINTMENT

Did we build a something that nobody wants / needs?

“Life is too short to
build something no
one wants.”

- Ash Maurya,
Author of Running
Lean

Why Focus on Value?

DELIGHT

Working on what customers value leads to better business outcomes

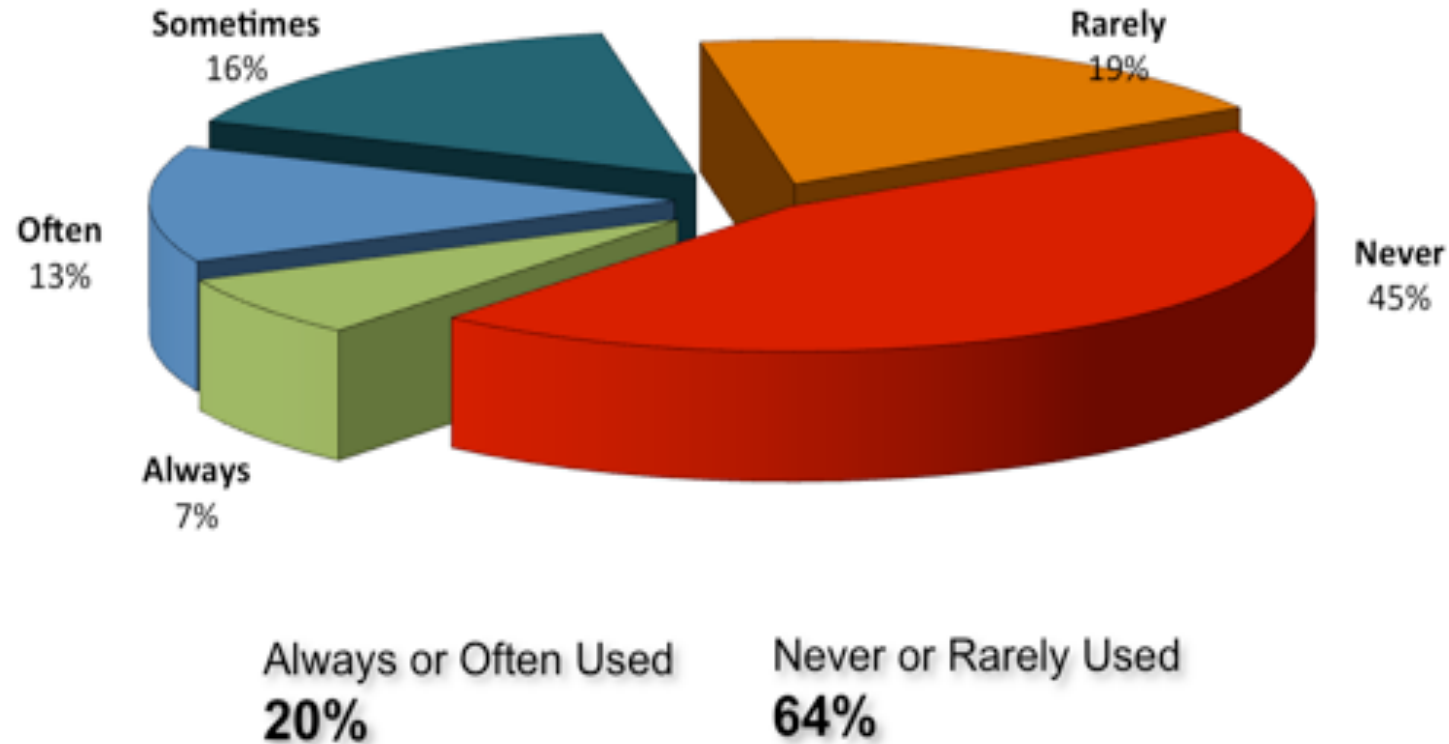

Why Focus on Value?

**Demands
consistently
exceeds our
capacity to deliver**

Use our capacity to build the most valuable things

Why Focus on Value?

Large percentage of the features are rarely or never used

Standish Group Study Reported at XP2002 by Jim Johnson, Chairman

Build something that people actually want and are willing to pay for

How do we Determine Value?

WHO are we creating value for?

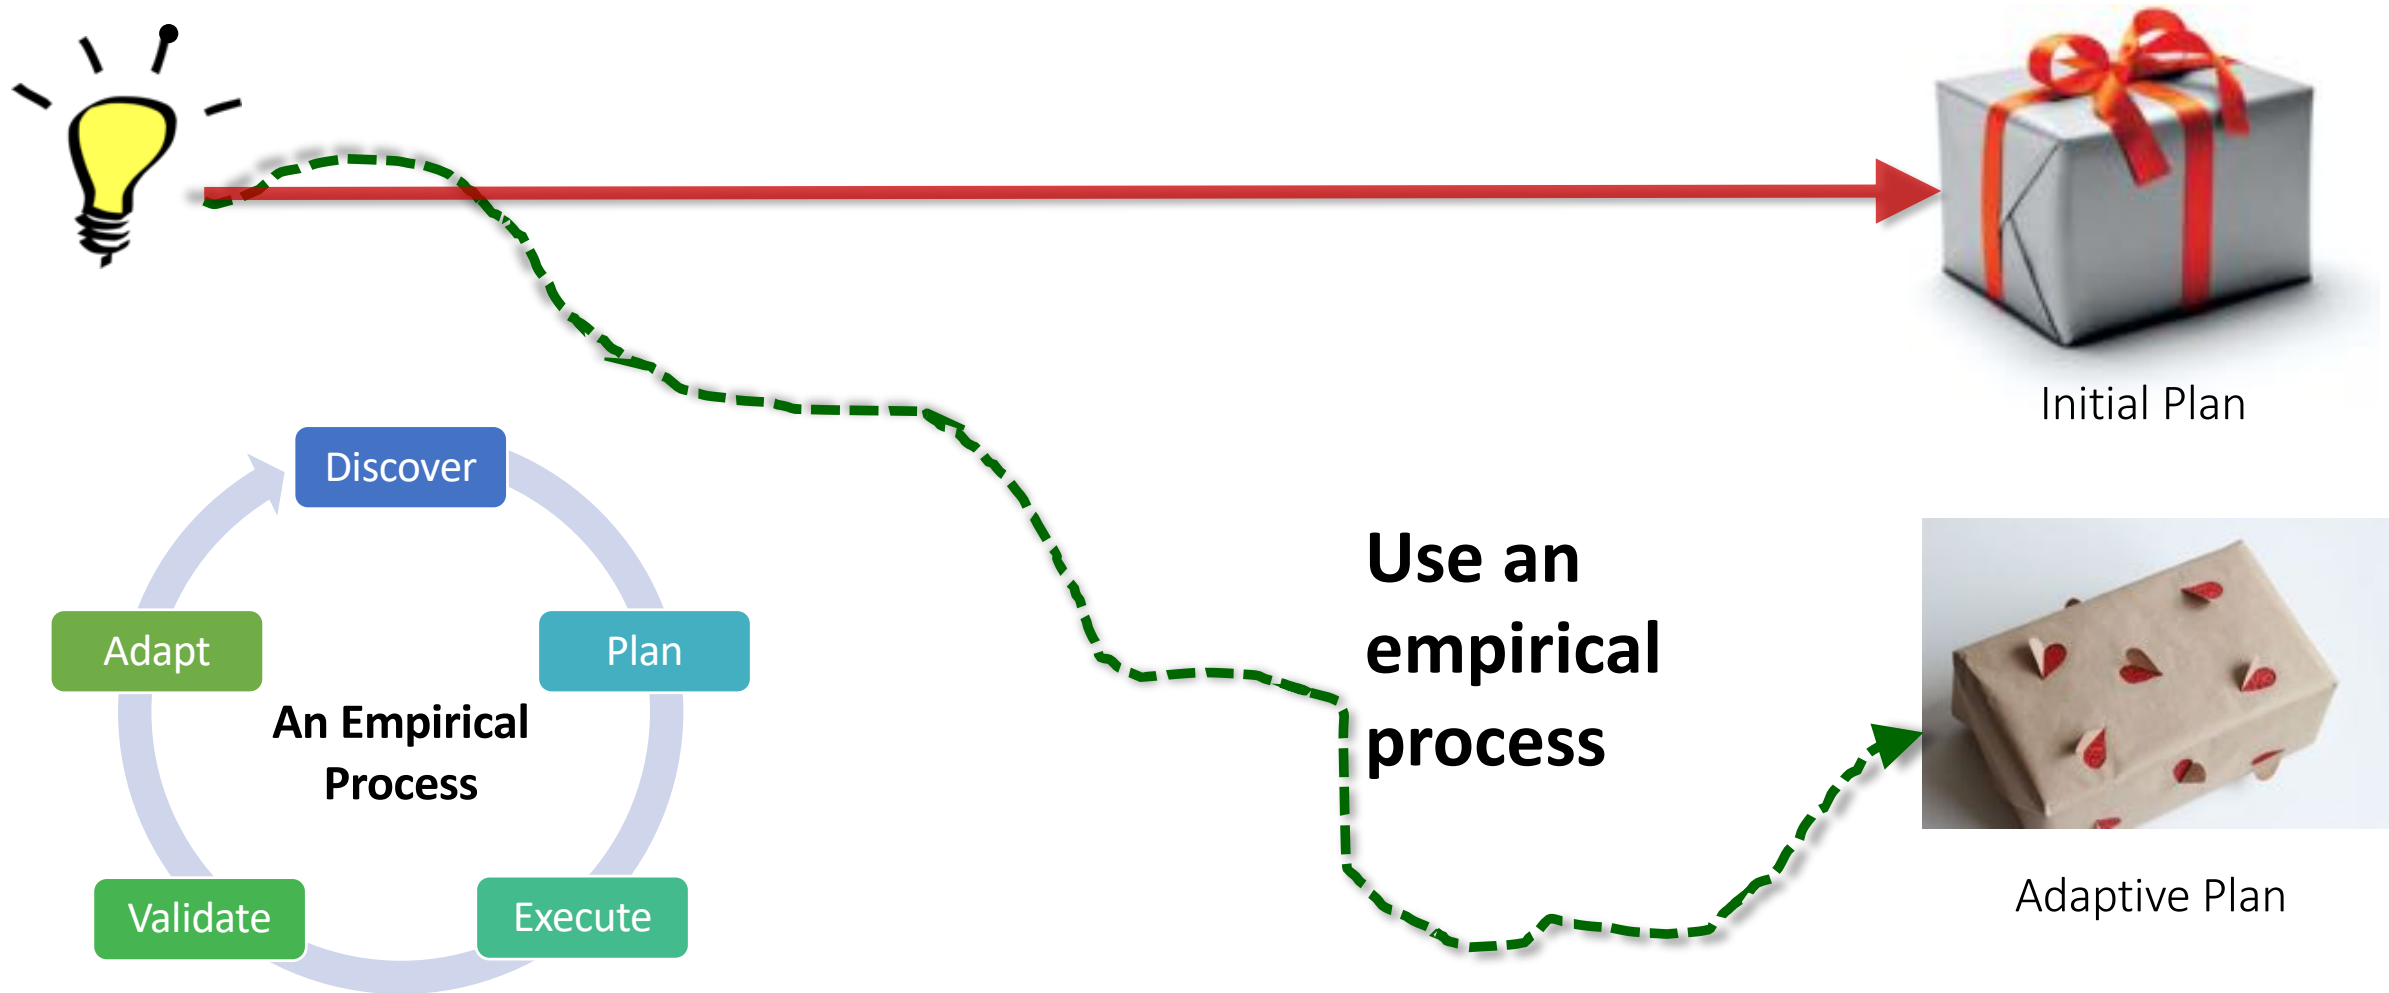

WHAT are their needs, expectations, desires, pain points?

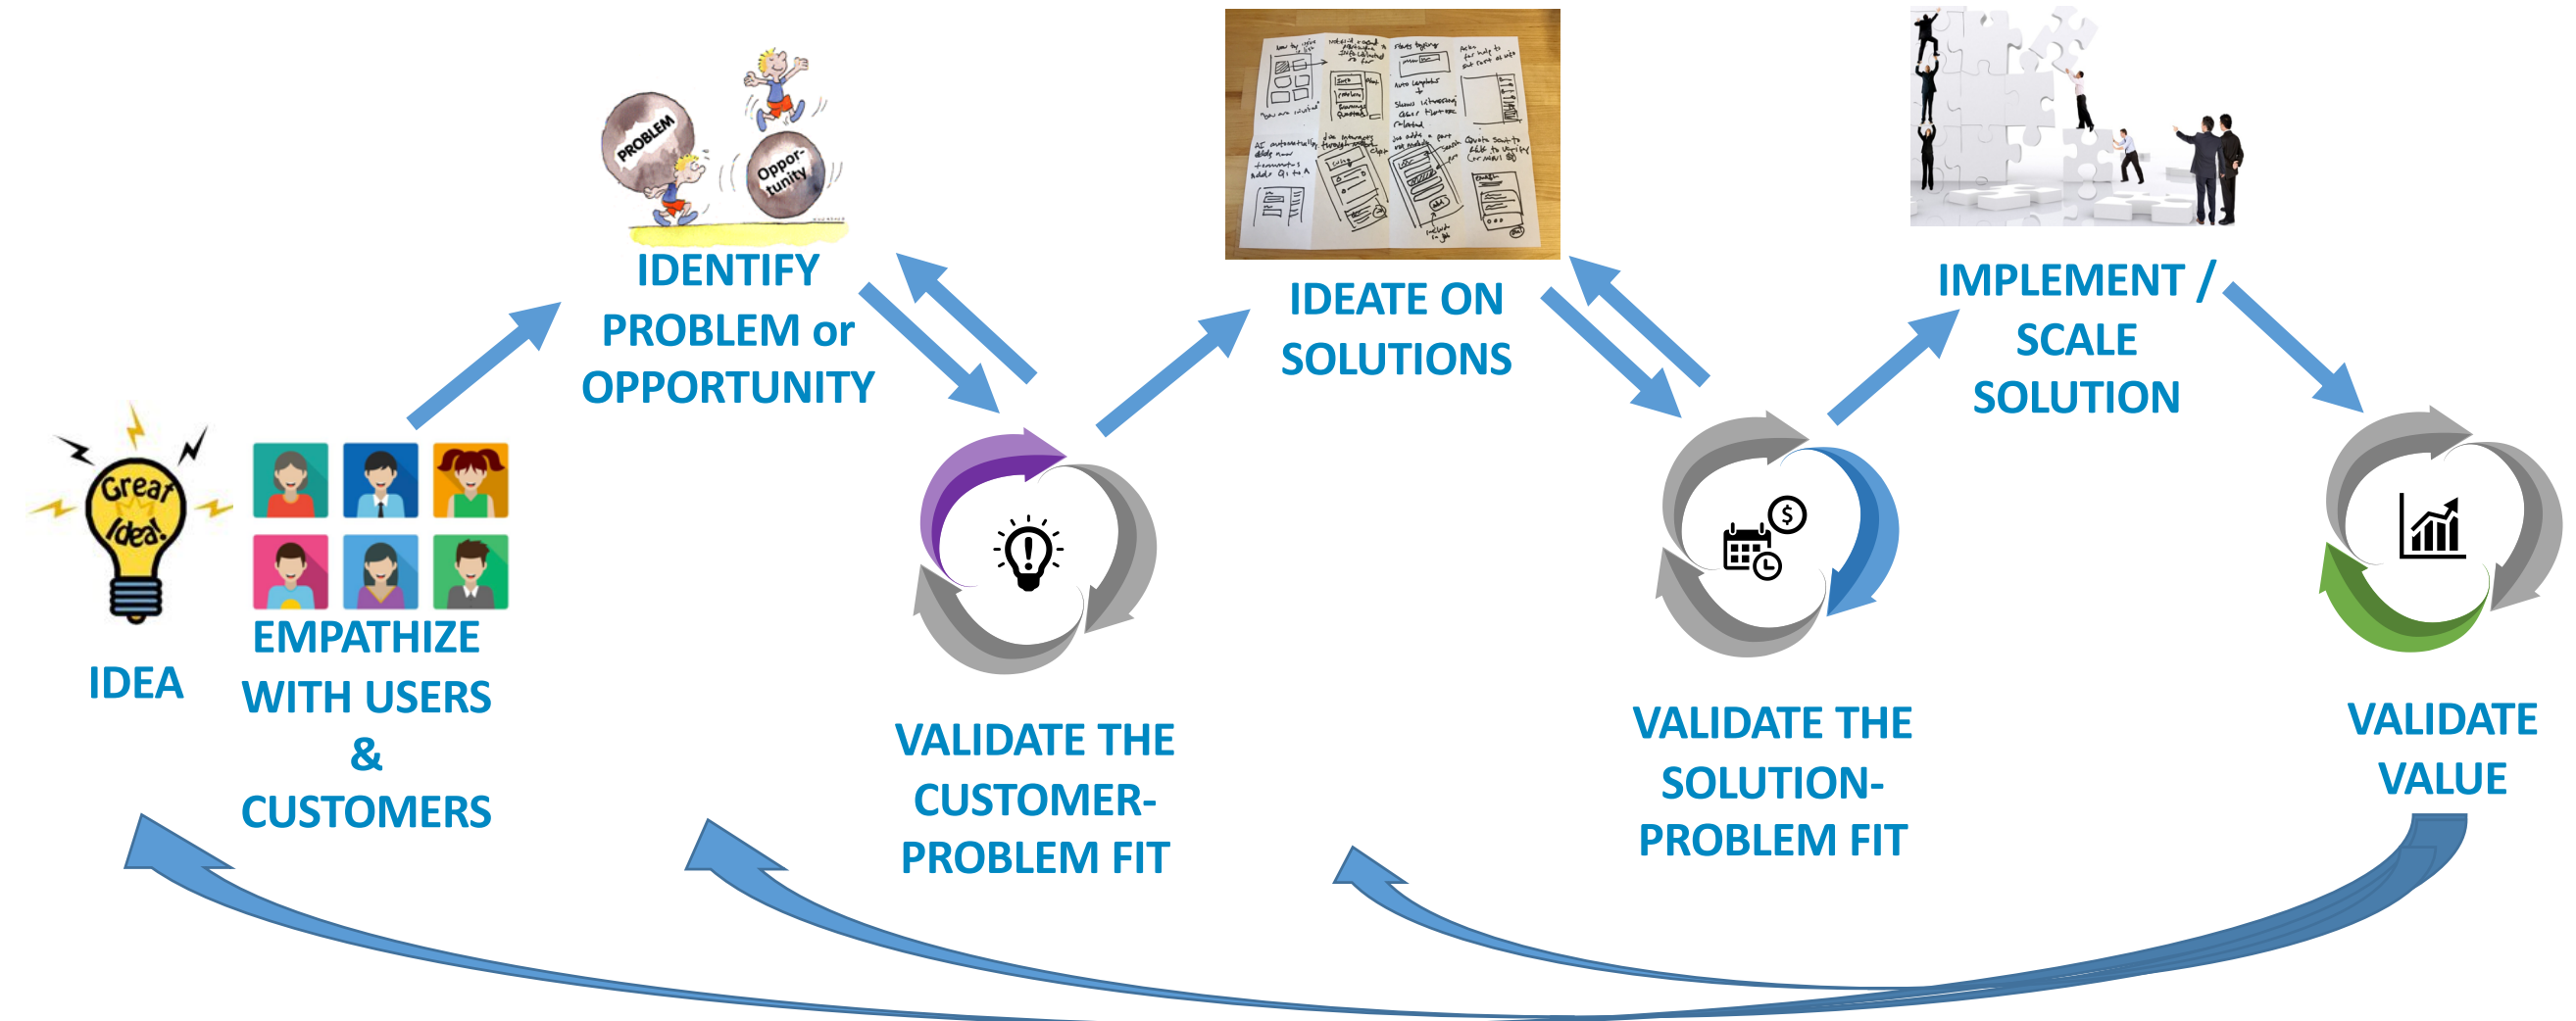

WHAT are they willing to pay for the benefit they receive?

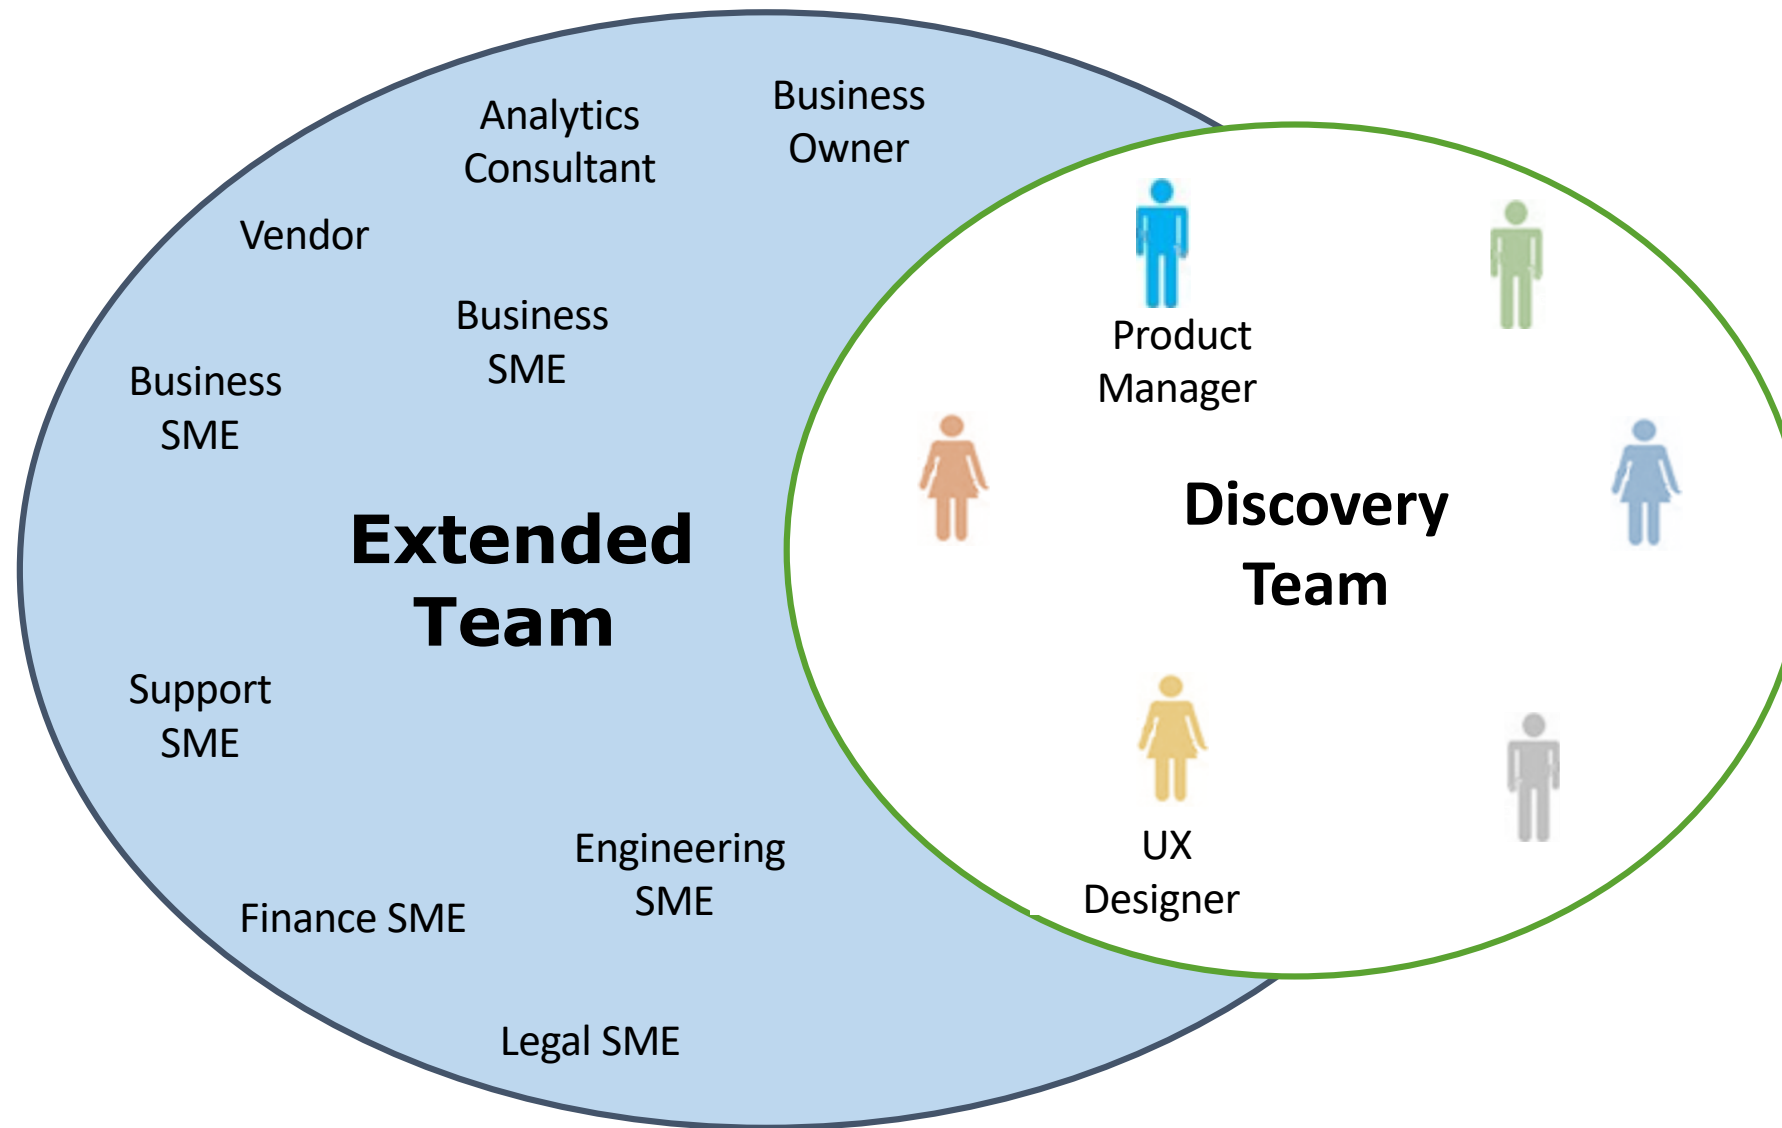

How do we know we are creating value?

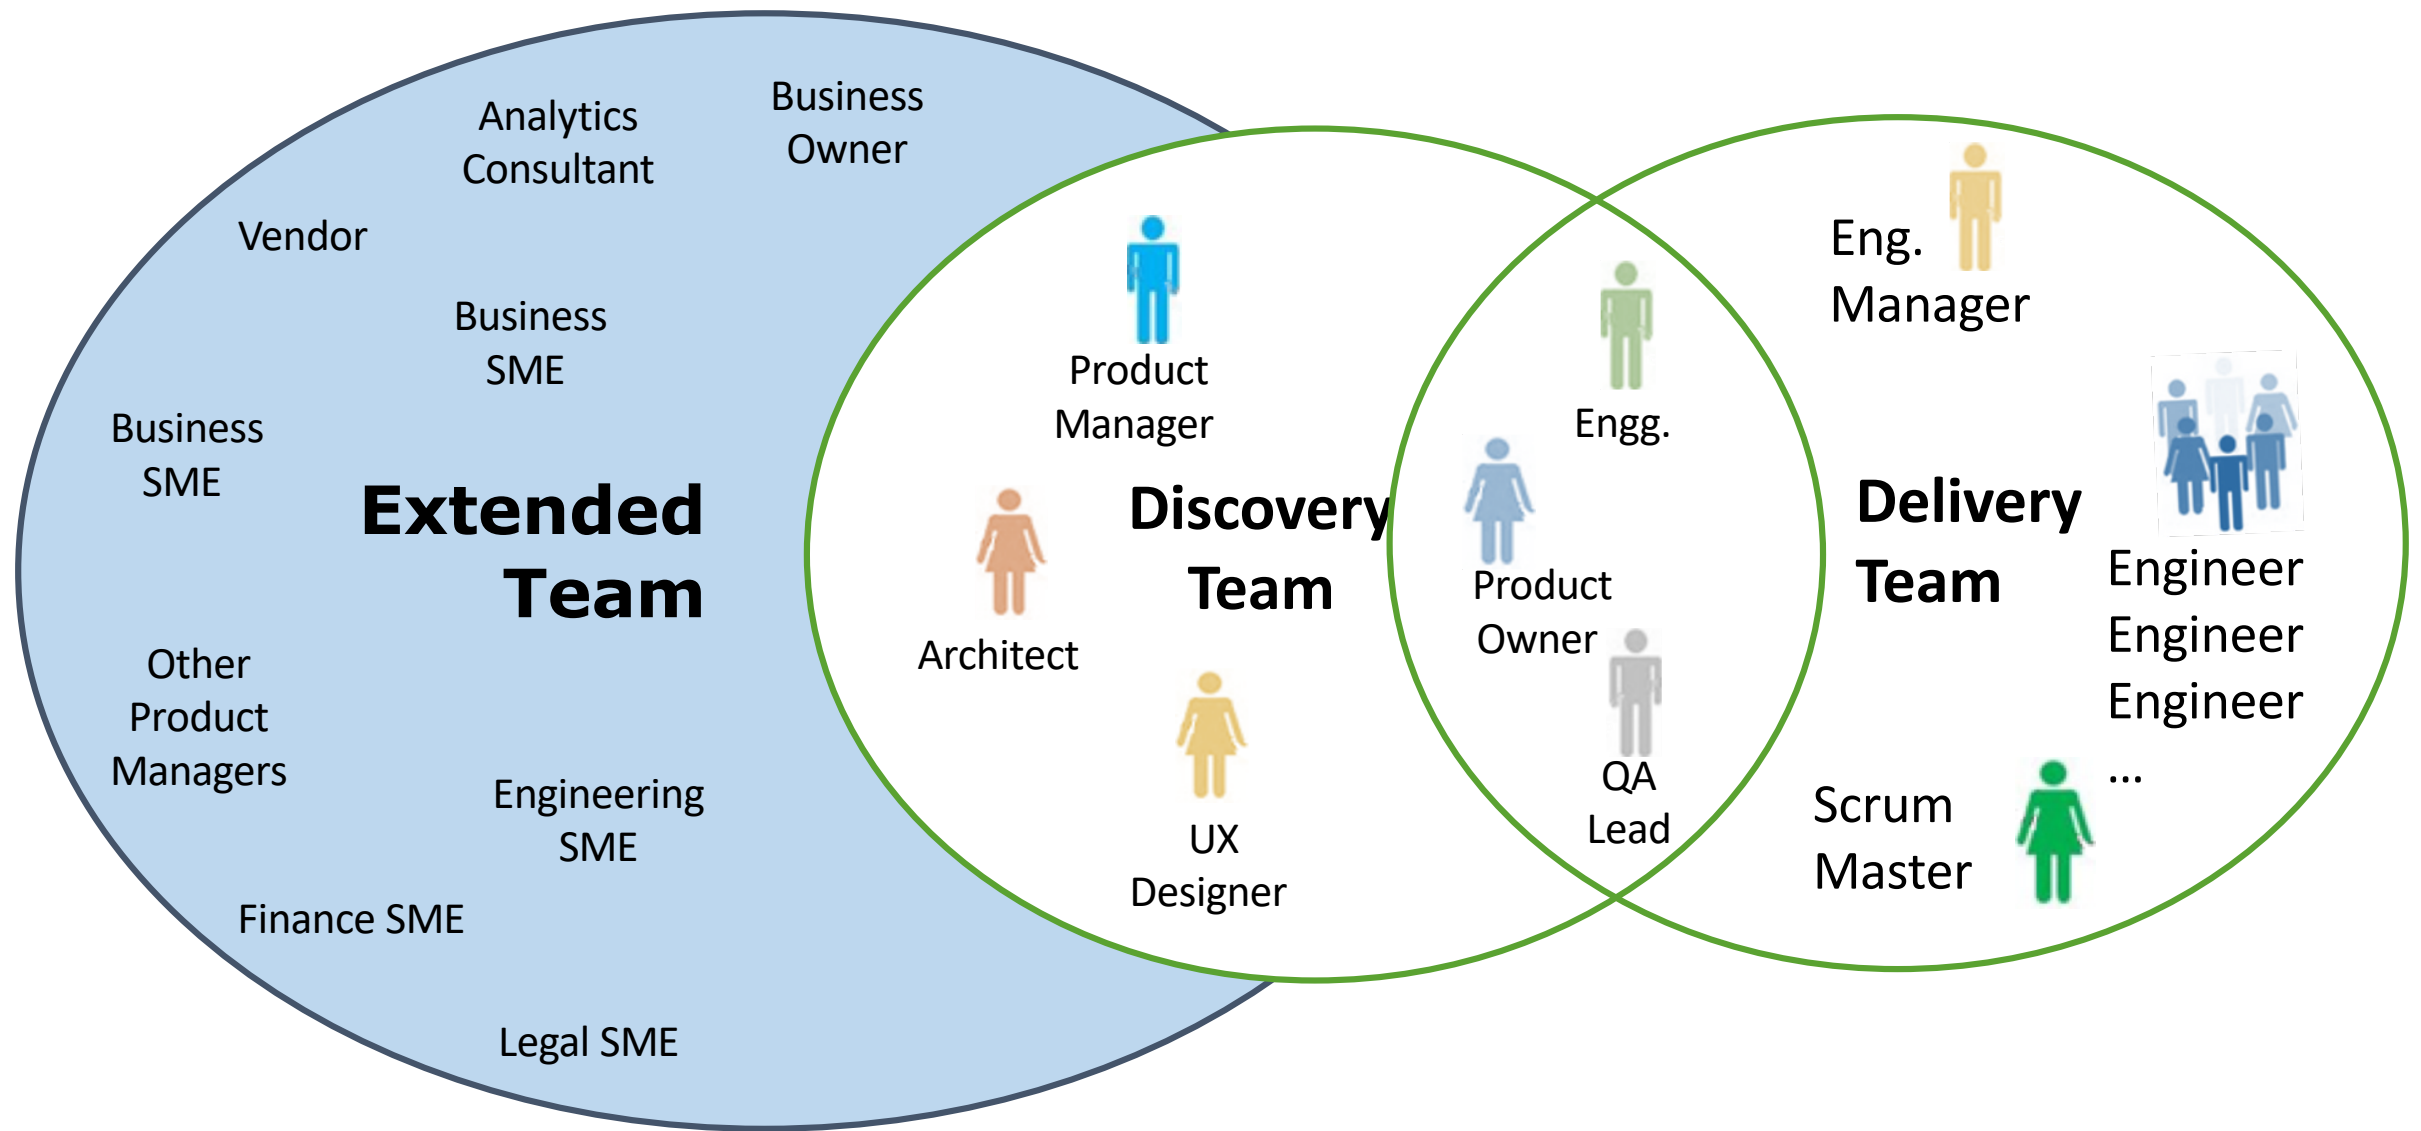

IDEA to VALUE

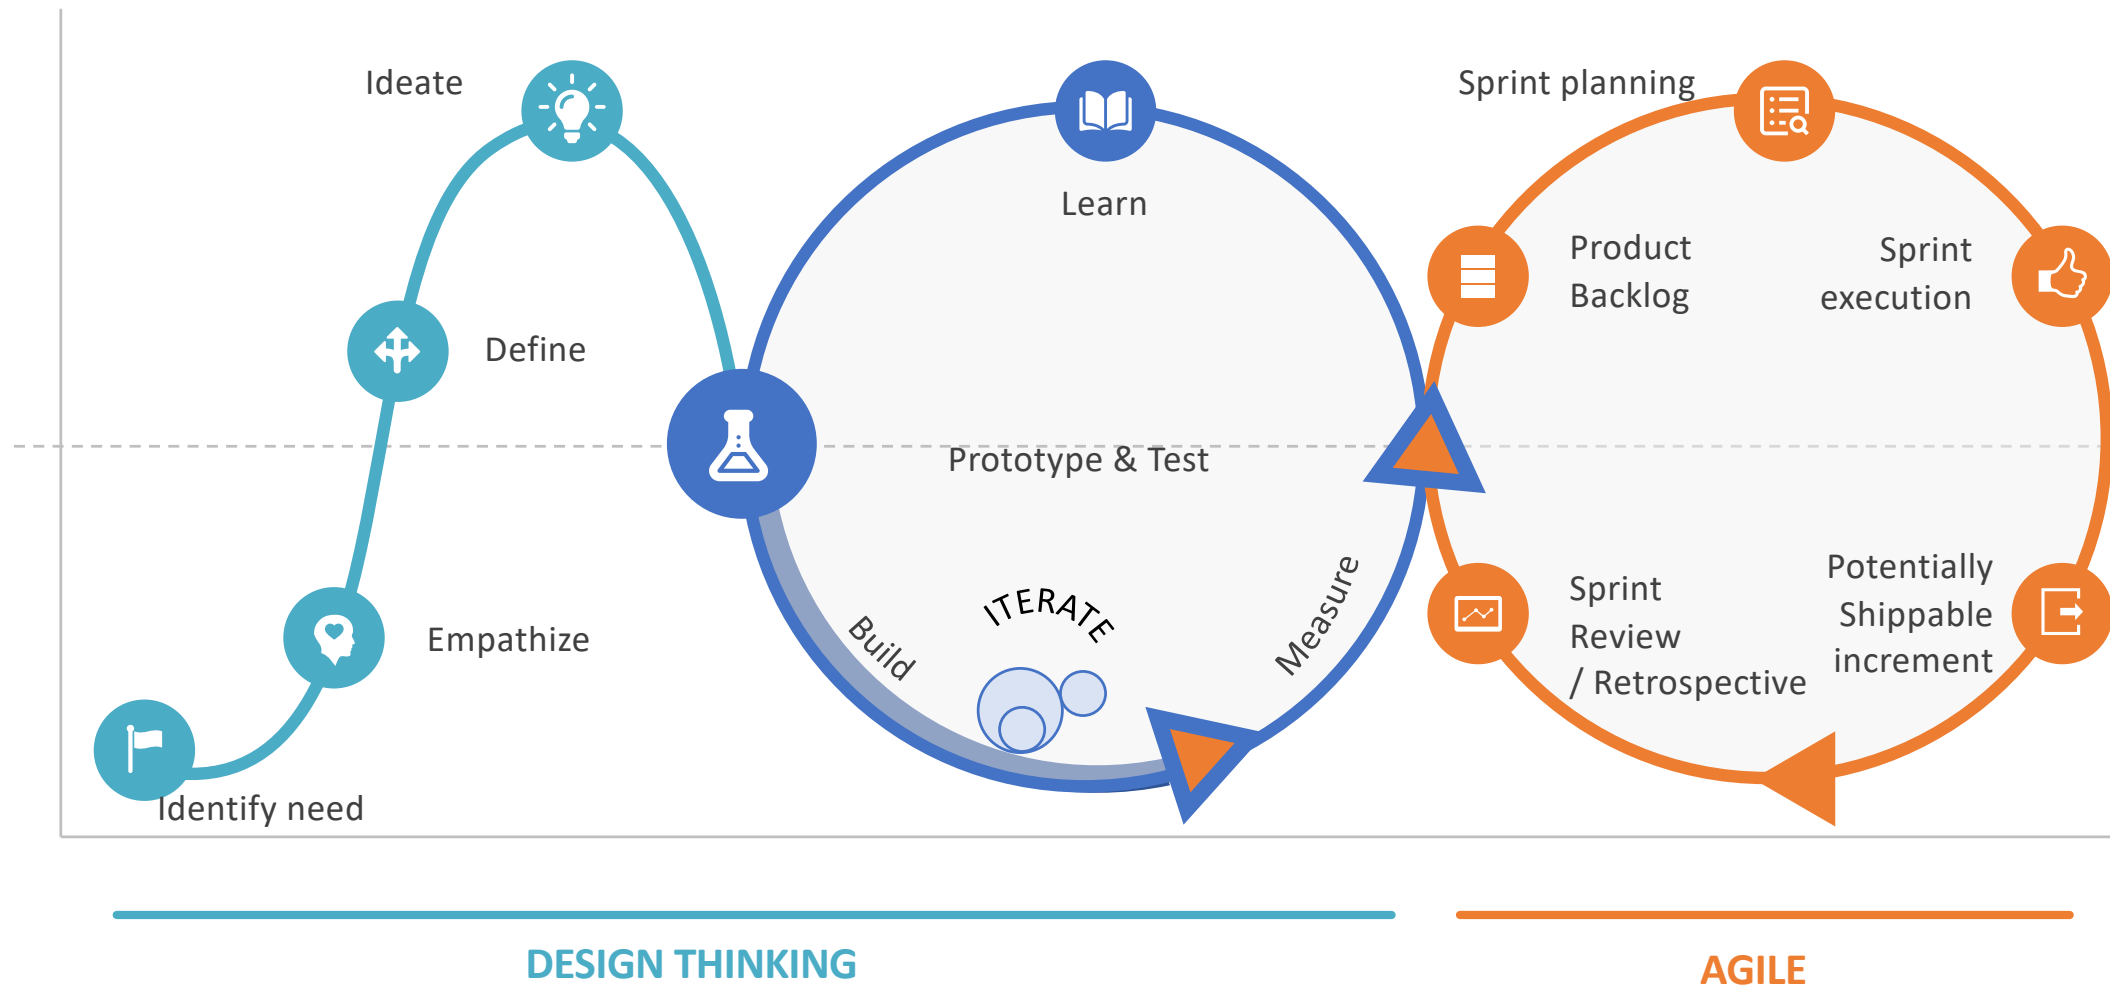

Cross-Functional Team

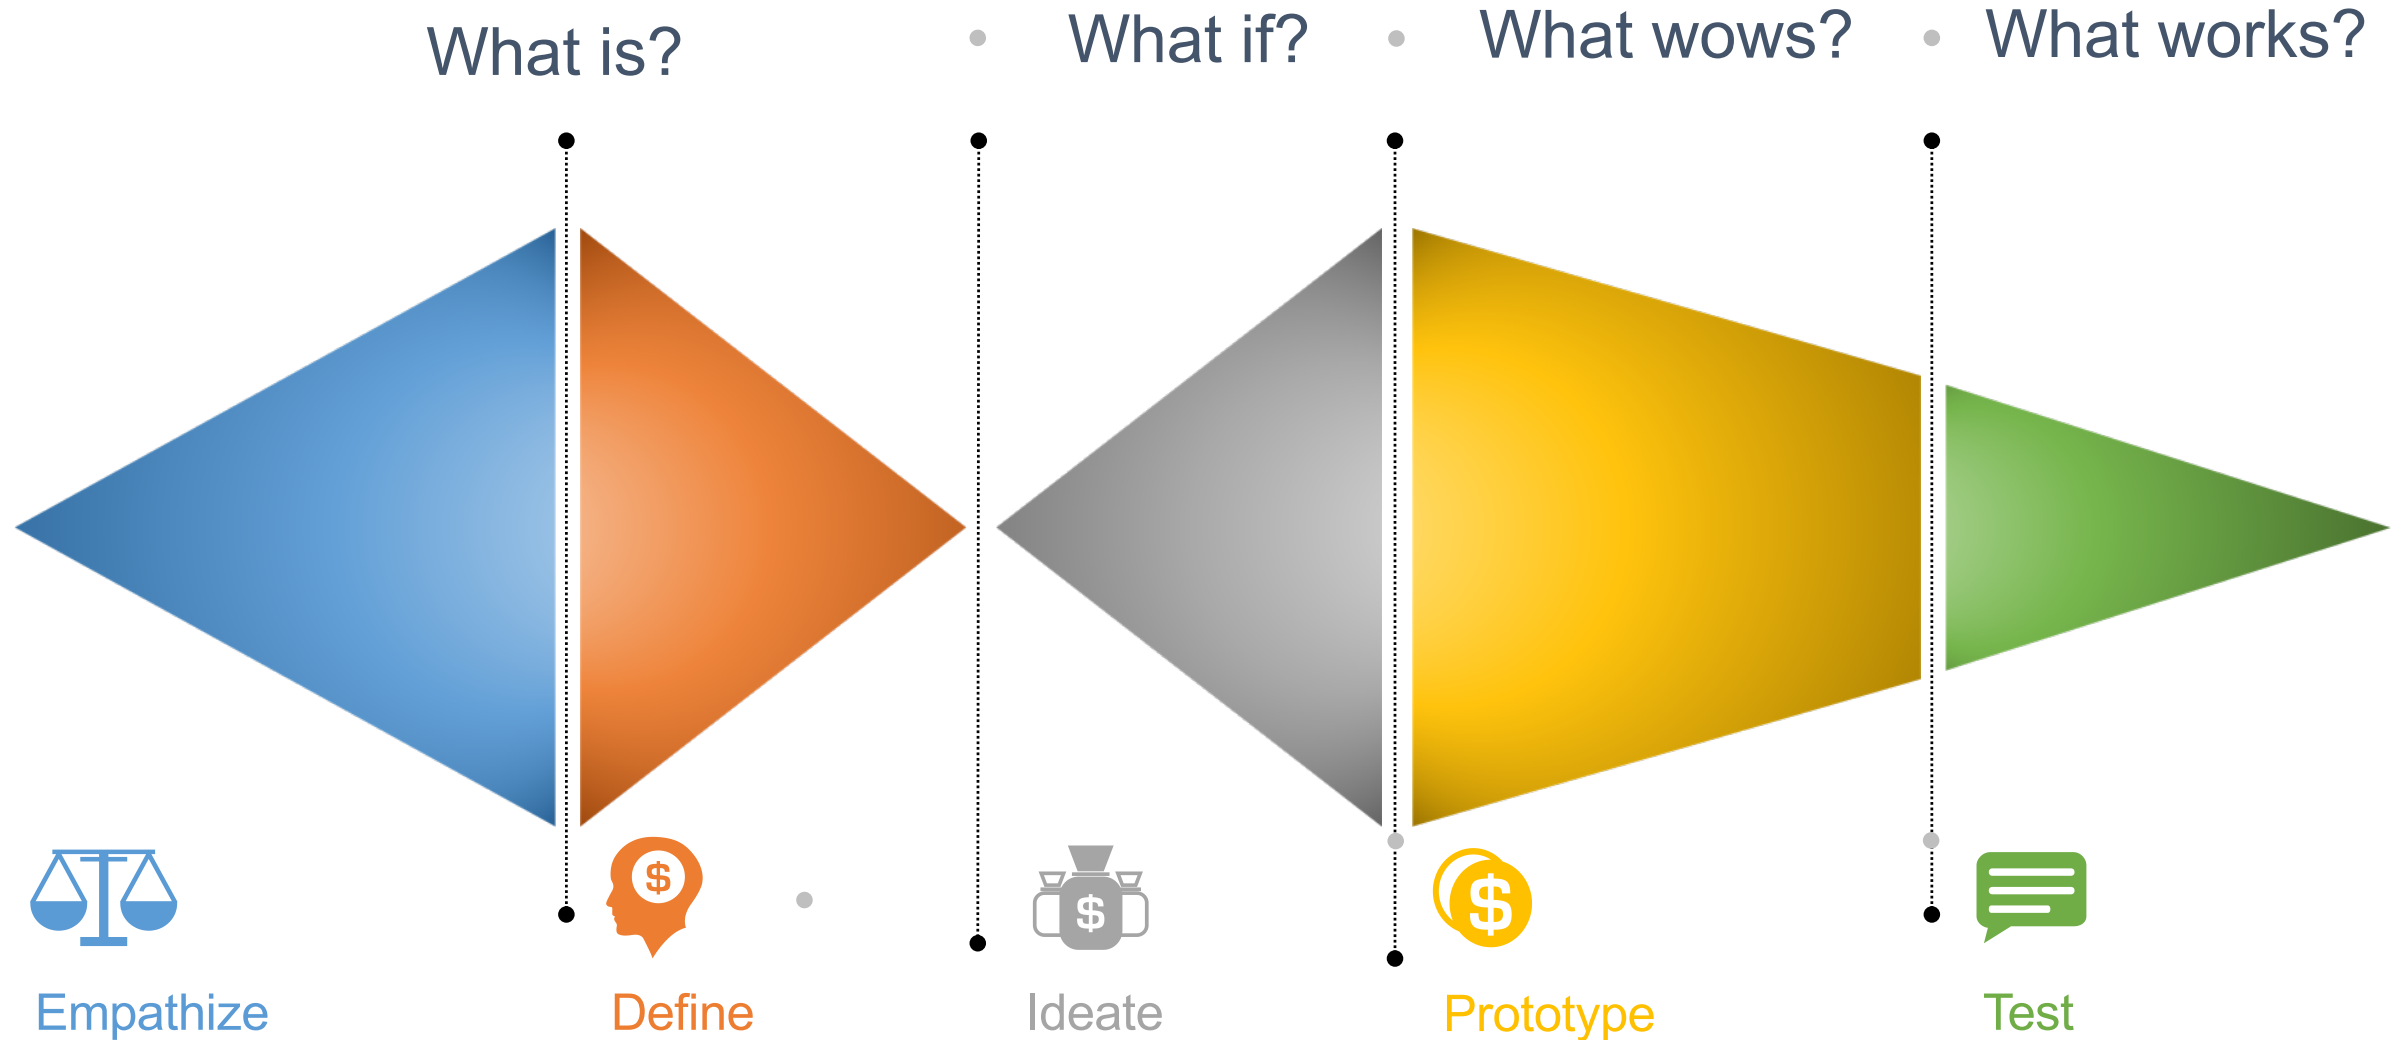

Discovery & Delivery

Discover, Deliver and Validate Value

The Design Thinking Framework

Think about a project for your simulation

Here are some examples to stimulate your thinking.

- **Co-working Community:** Gig workers want a convenient, energizing place to work and connect with other gig workers.
- **Campus Guide App:** I would like an easy way to find my way around a campus – Locate where I am on campus, get clear directions to a room, find meeting / huddle room space, restrooms etc.
- **Dynamic Teaming Connector:** A way for a project leader to connect to the right people and skills to fulfill a mission.
- **Medication Reminder:** Medication Reminder for Seniors. Alerts them if they have not taken their meds., when they need a refill etc.

Who is the target group?

WHO does this product / service address?

Users interact directly with the system.

Customers make buying or adoption decisions.

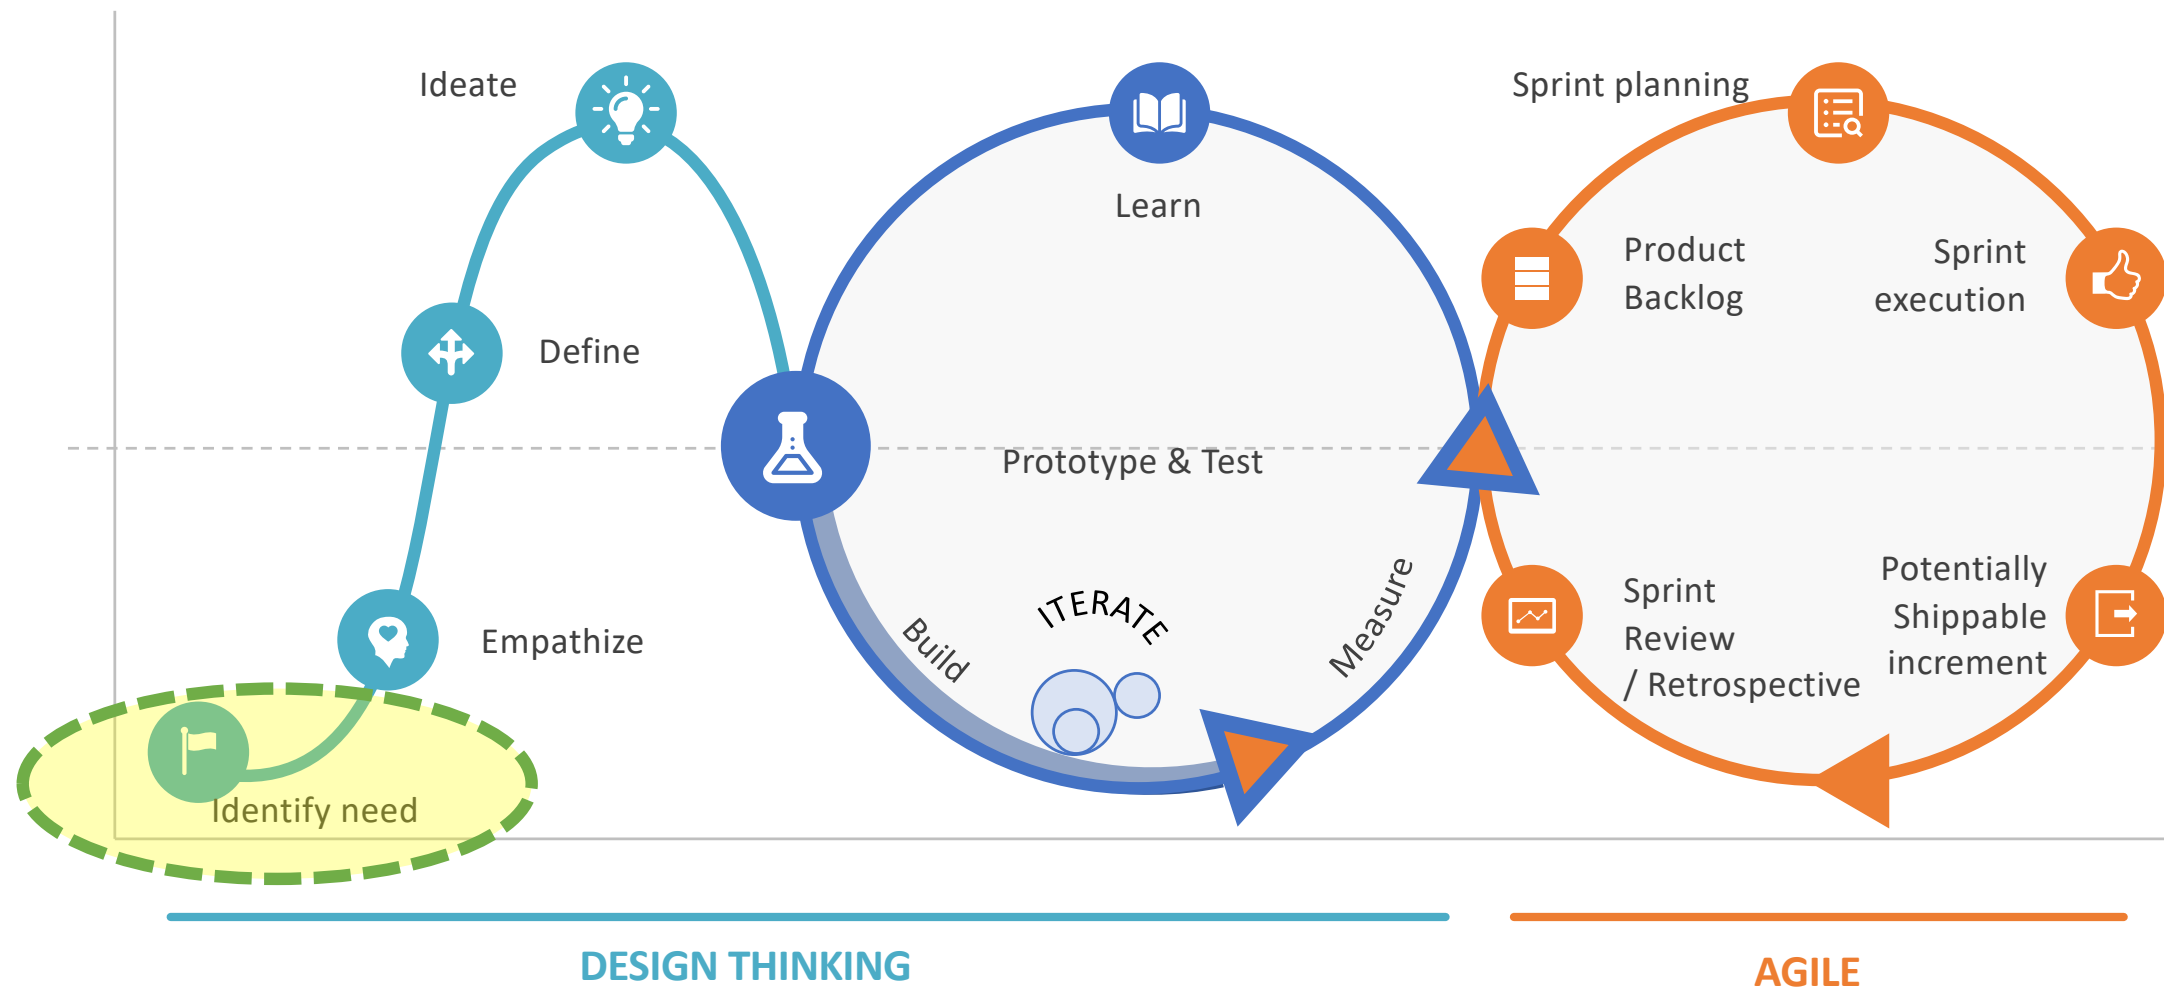

Target market is a group that is focused on

Internal customers serve external customers and users.

Discover, Deliver and Validate Value

Identify the Need

WHY should/does this product, service exist?
Why will someone use or pay for it?

What problem are we trying to solve?

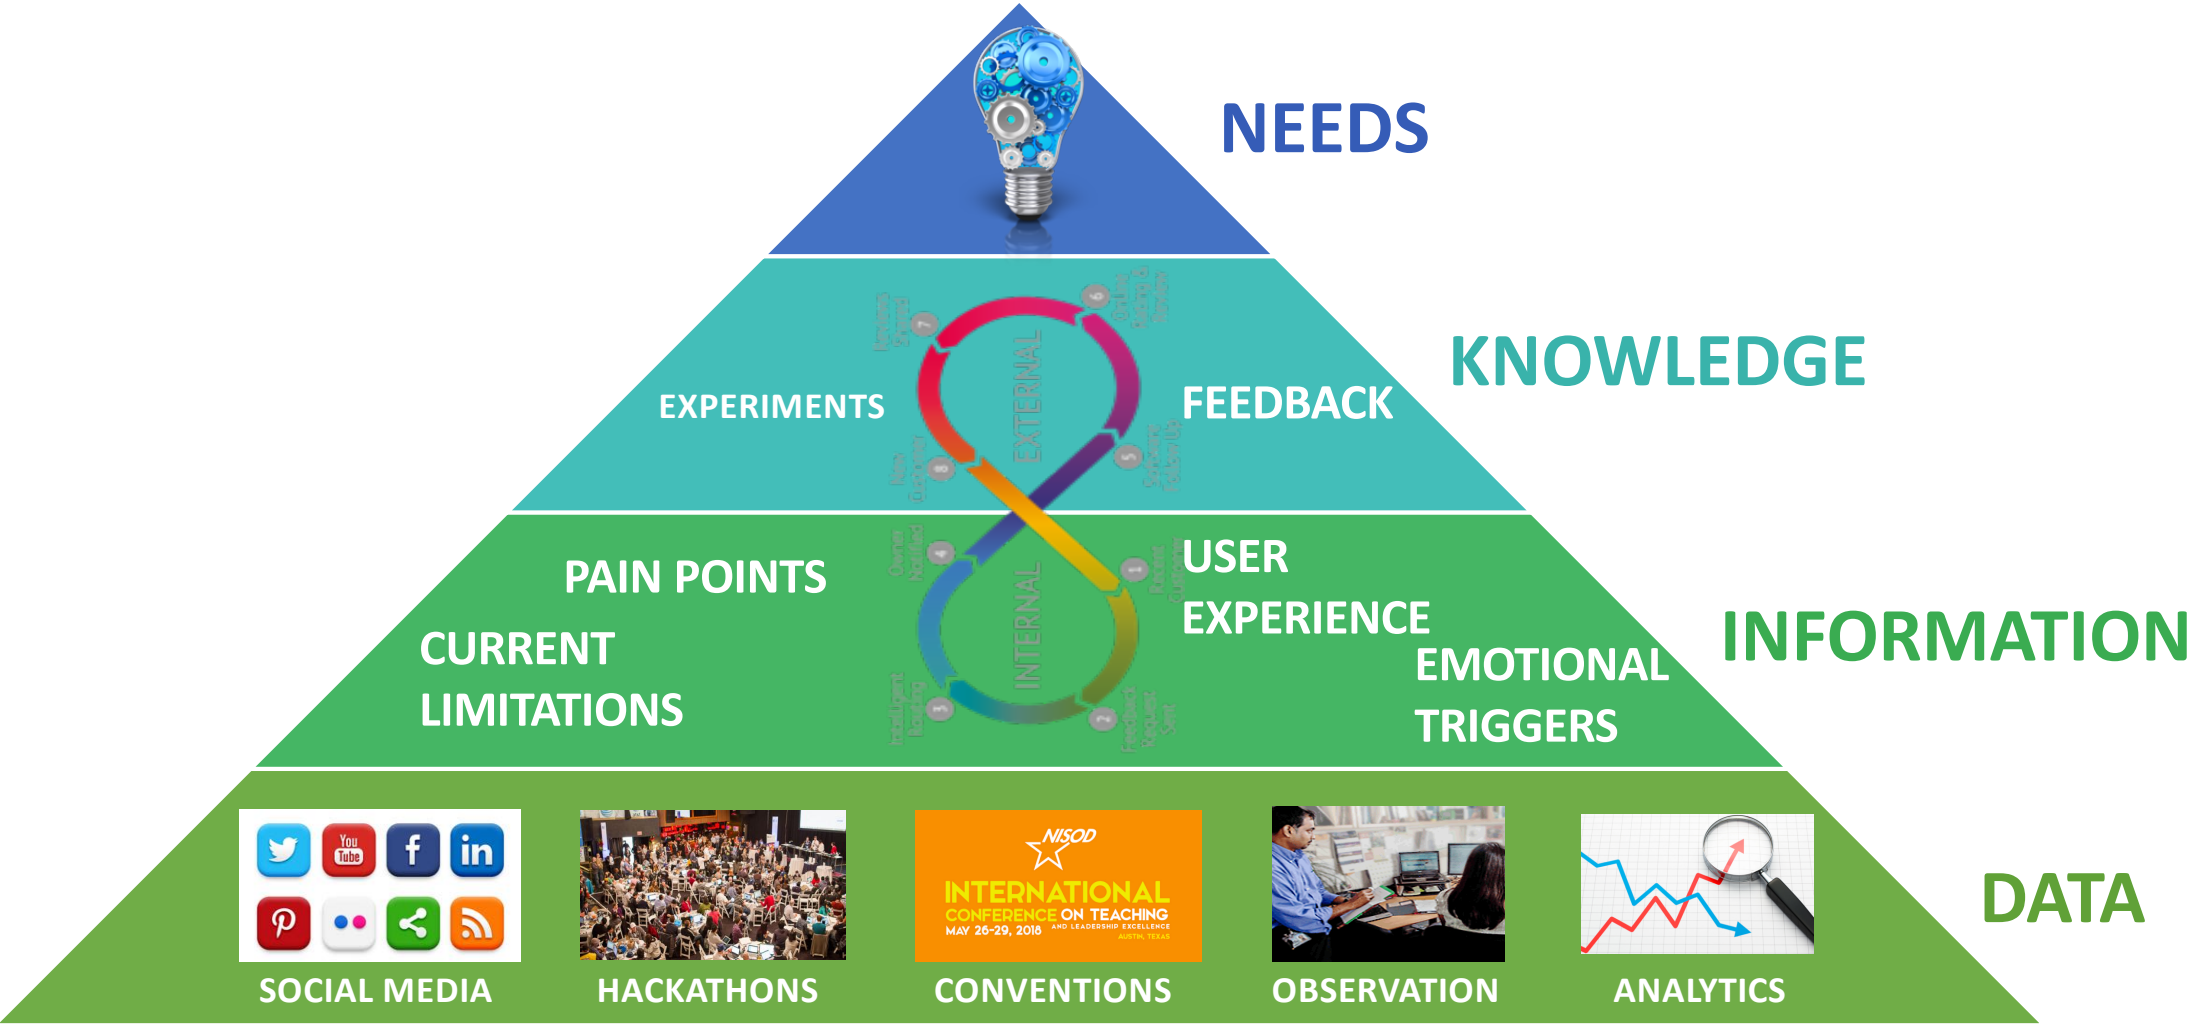

- What pain / problems are our users facing?
- What unmet needs exist?

What benefit can we provide?

- What business outcome are we trying to achieve?
- What user's pain points can we address?

How do we identify needs?

Impact Mapping

Impact Mapping – Step 1

GOAL

Reduce
conference
carbon footprint
by 50% by 2021

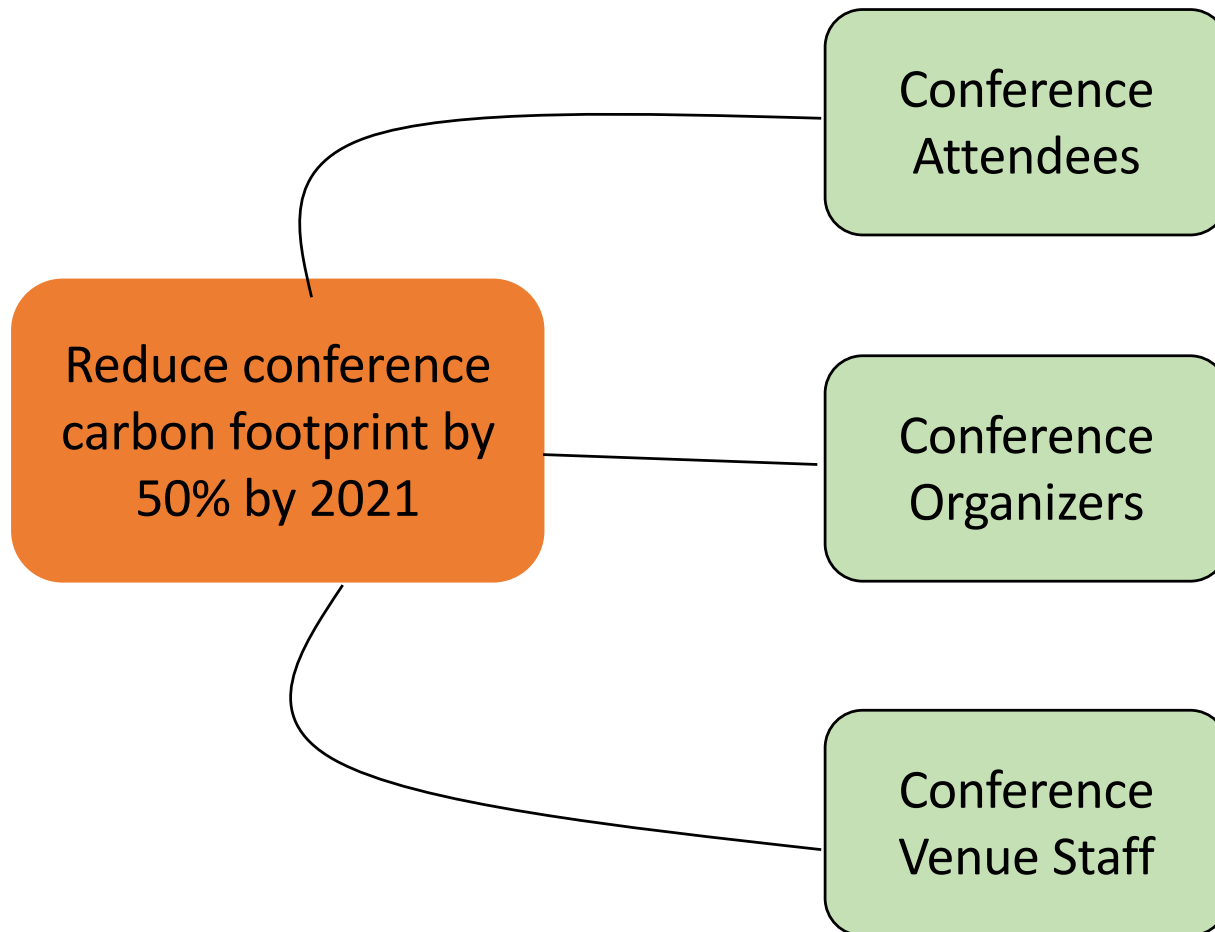

Goal describes the outcome we are trying to achieve

Consider:
Why are we doing this?

Impact Mapping – Step 2

GOAL

ACTOR

Actors are those that can influence the outcome

Consider:

Who can produce the desired effect?

Who can obstruct it?

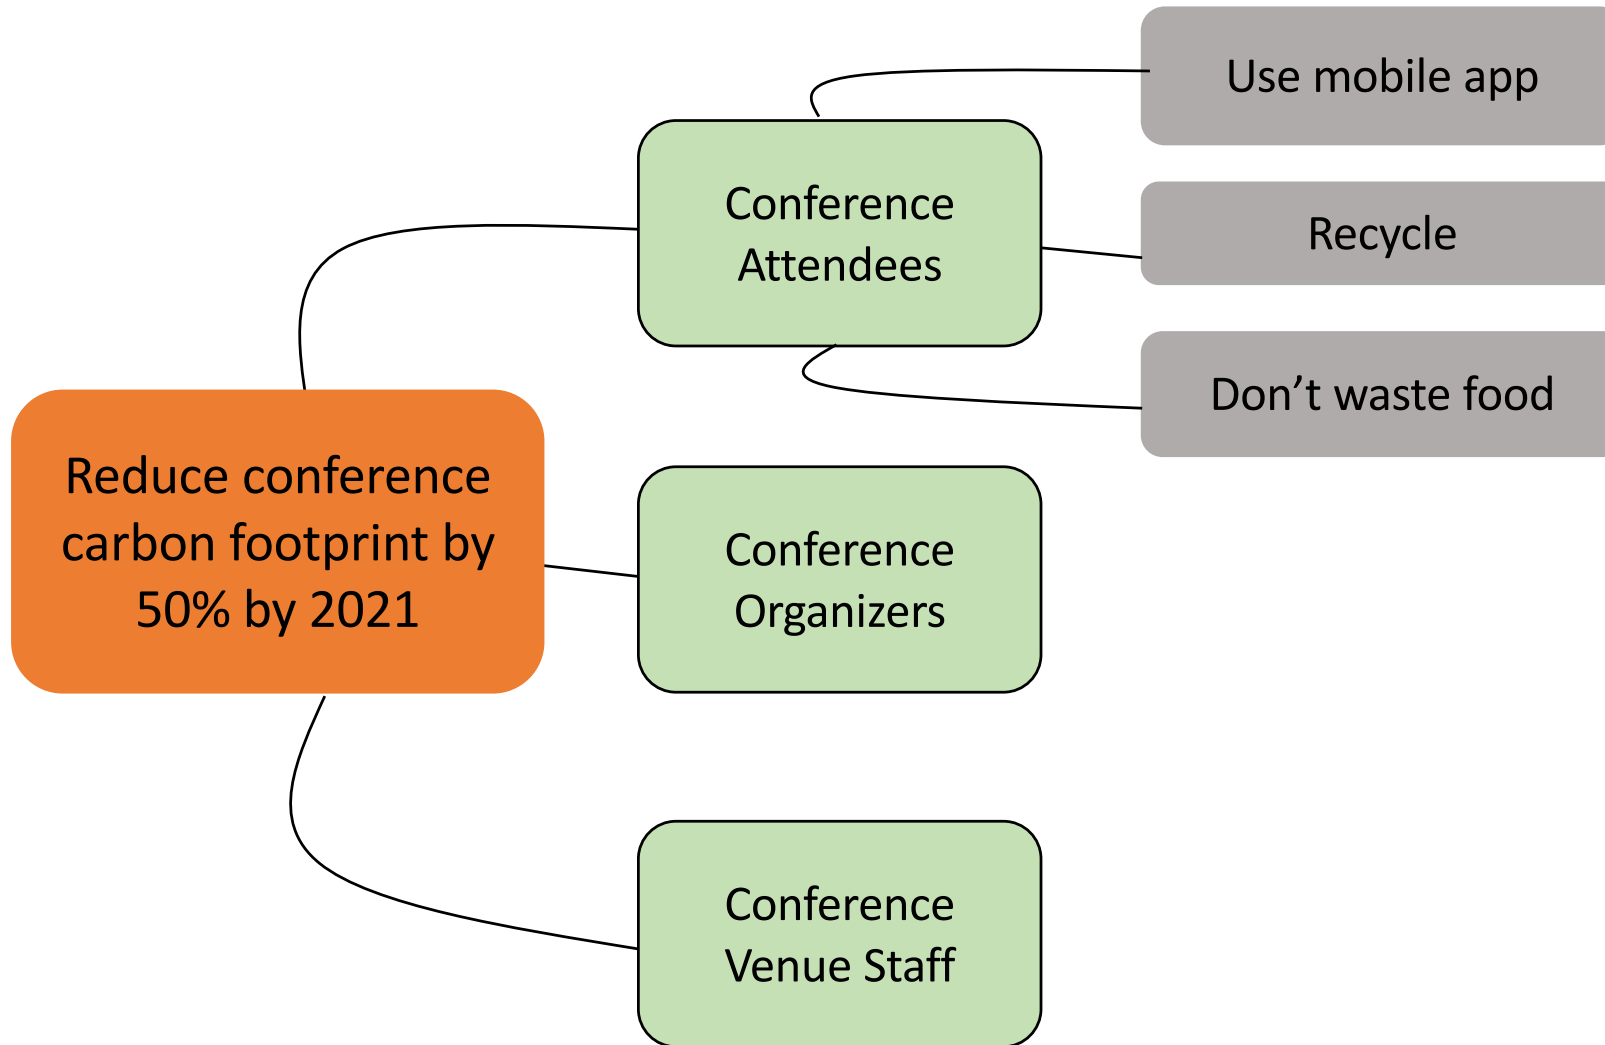

Who are the consumers or users of the product?

Who will be impacted by it?

GOAL

ACTOR

IMPACT

Impacts we are trying to create with the actor

Consider:

How should our actors behavior change?

How can they help us achieve the goal?

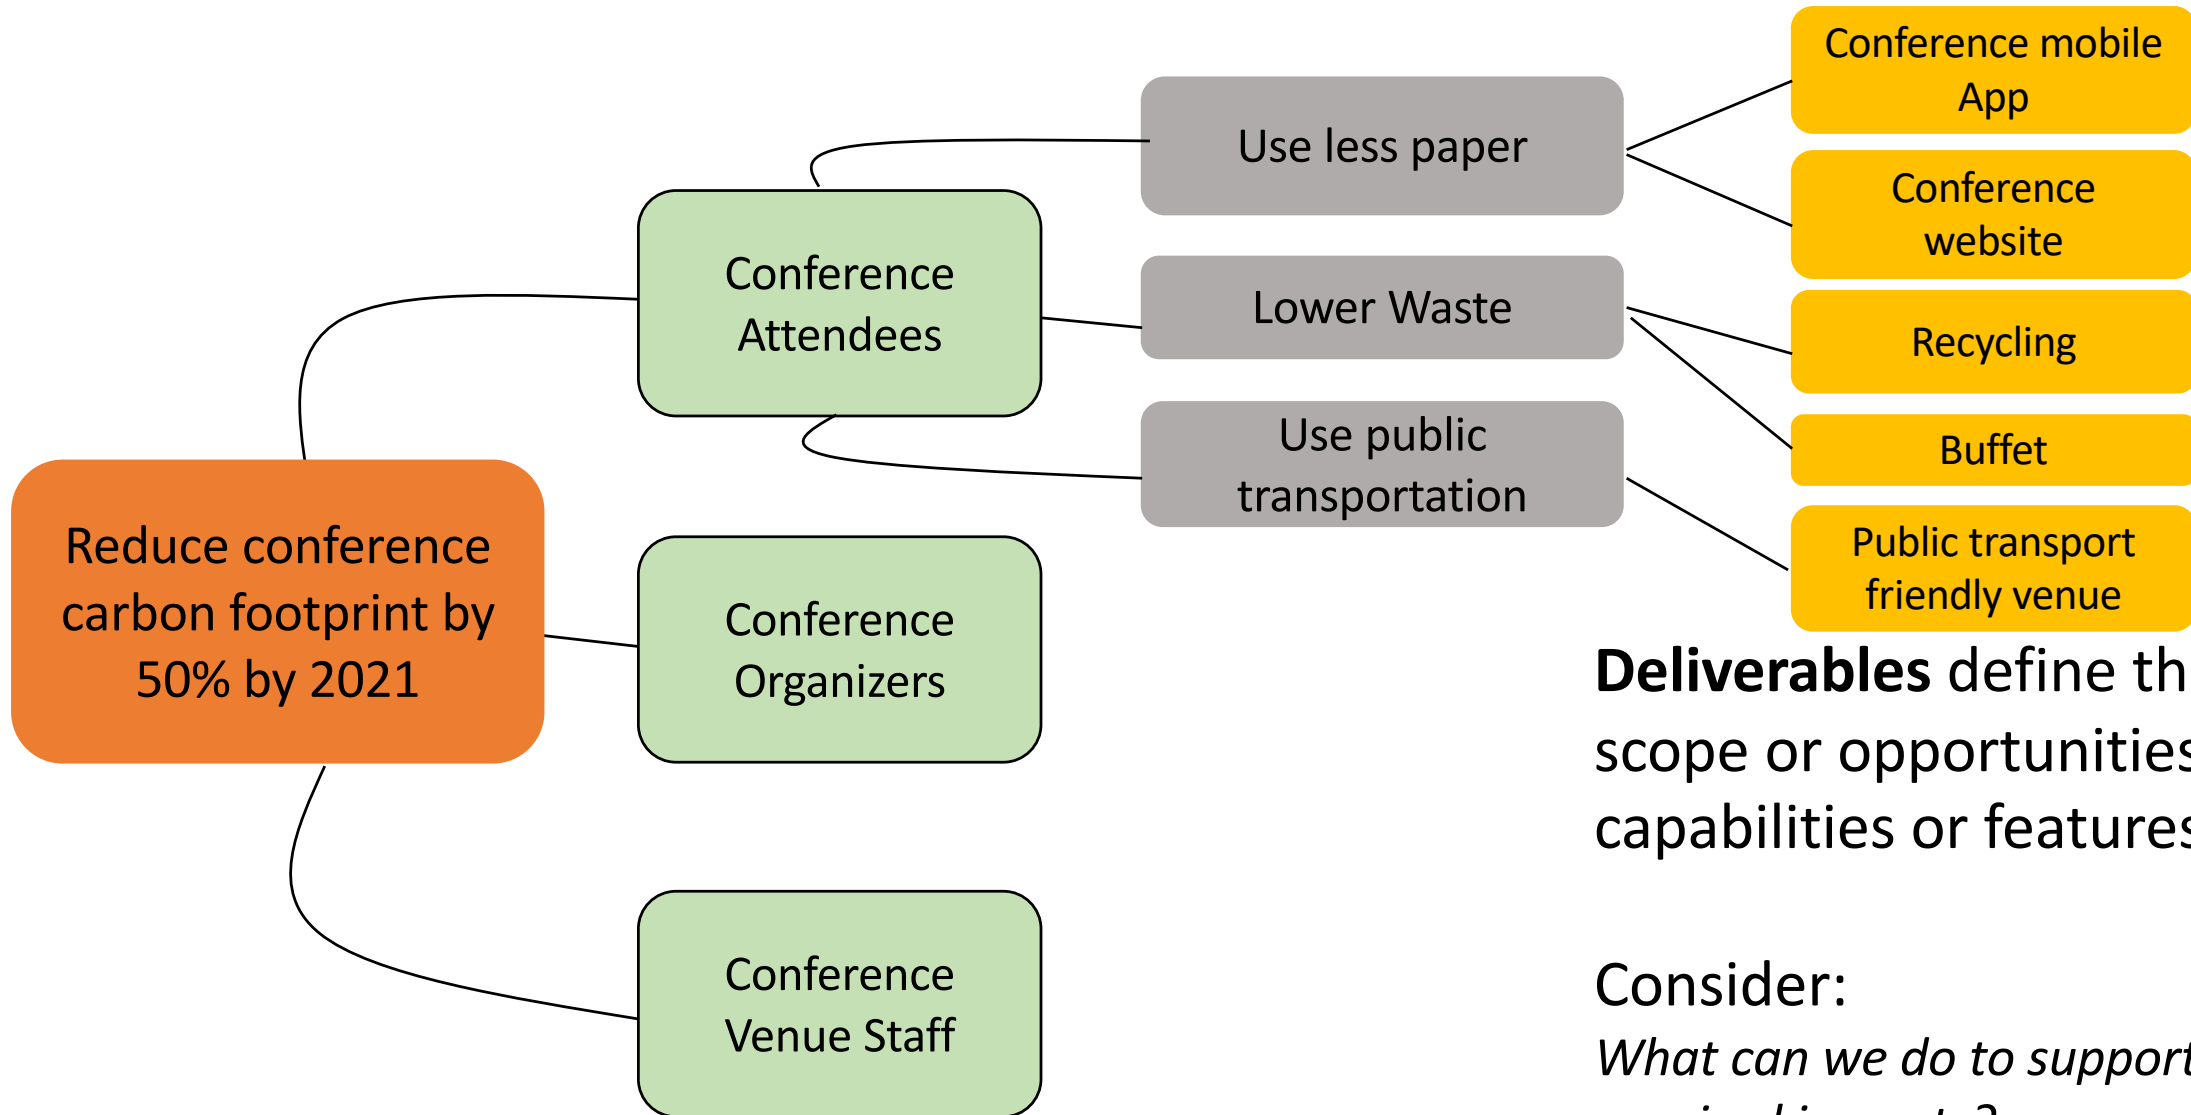

How can they obstruct or prevent us from succeeding?

GOAL

ACTOR

IMPACT

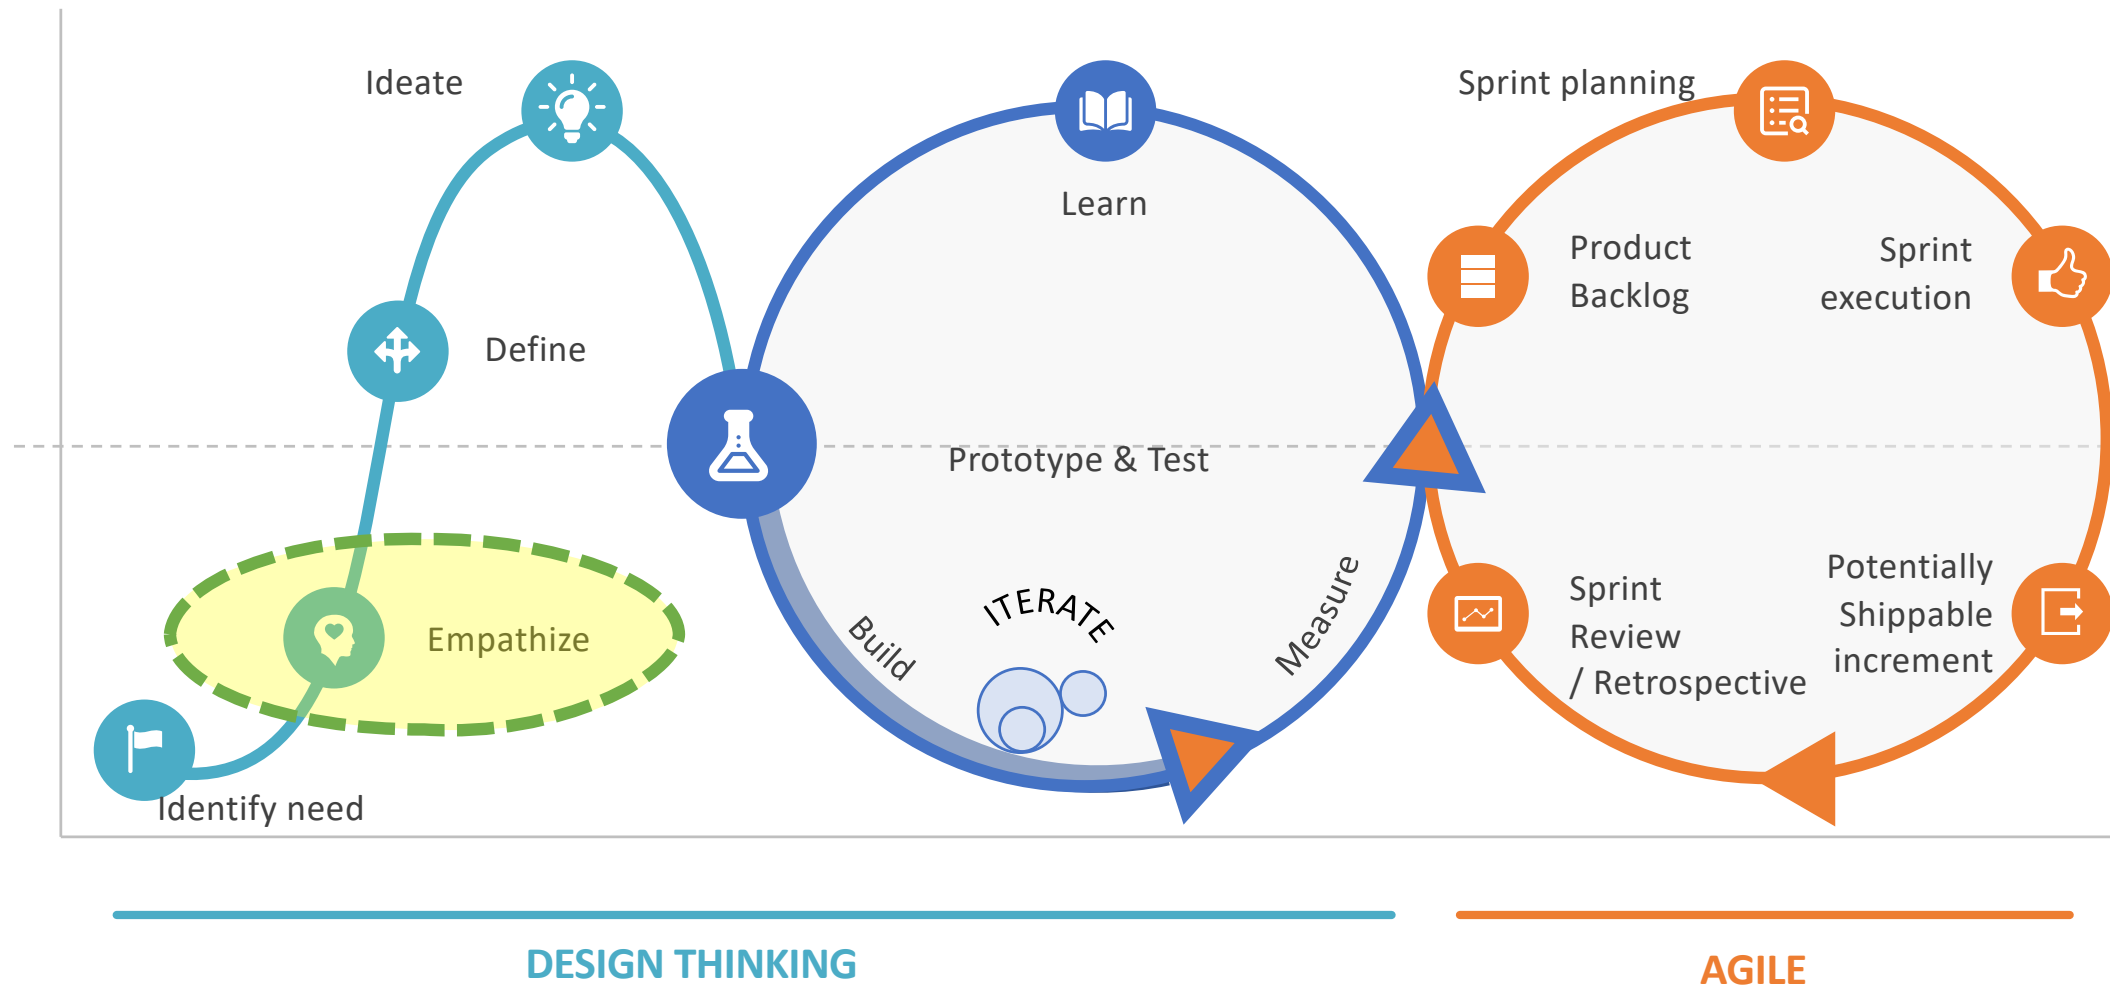

DELIVERABLE

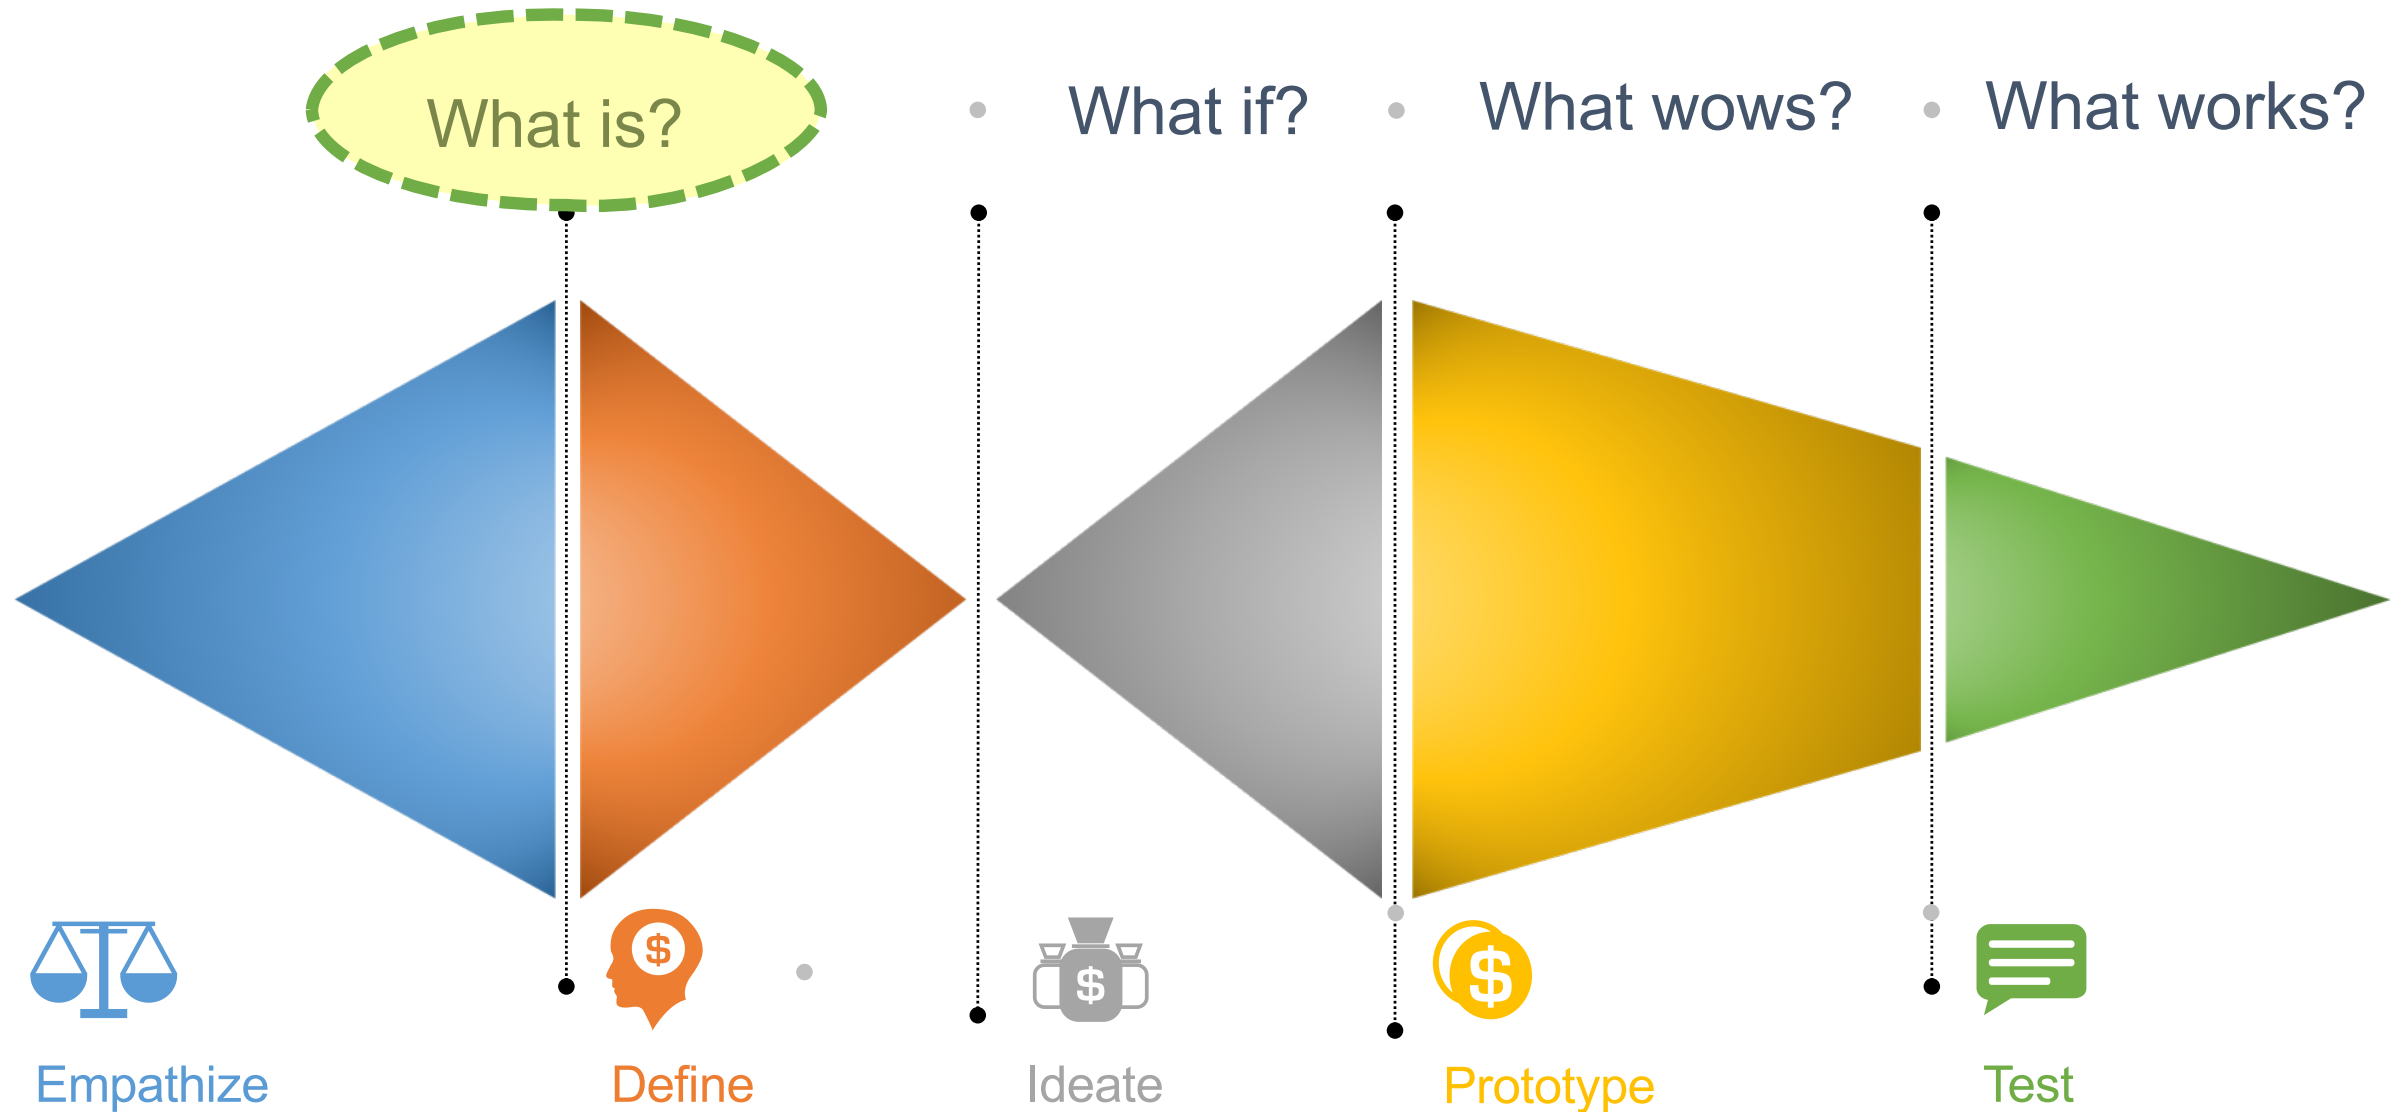

Deliverables define the scope or opportunities of capabilities or features

Consider:
What can we do to support the required impacts?

Discover, Deliver and Validate Value

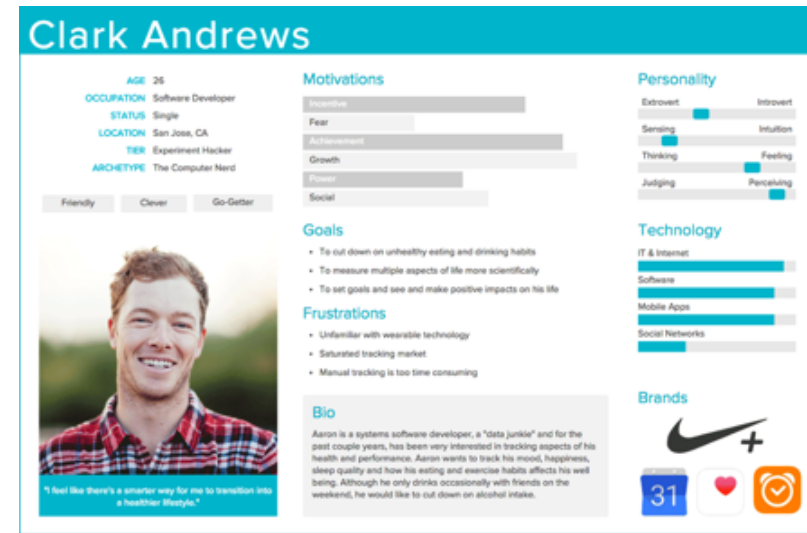

The Design Thinking Framework

Empathize through Personas

Personas are fictional characters that represent different user and customer types that use the product, service or solution in a similar way

- Based on research or direct interaction
- Identify / empathize with the user
- Understand users' behaviors, experiences, wants, needs and goals.
- Add a human touch to keep it fun and memorable.

Source: www.keepitusable.com

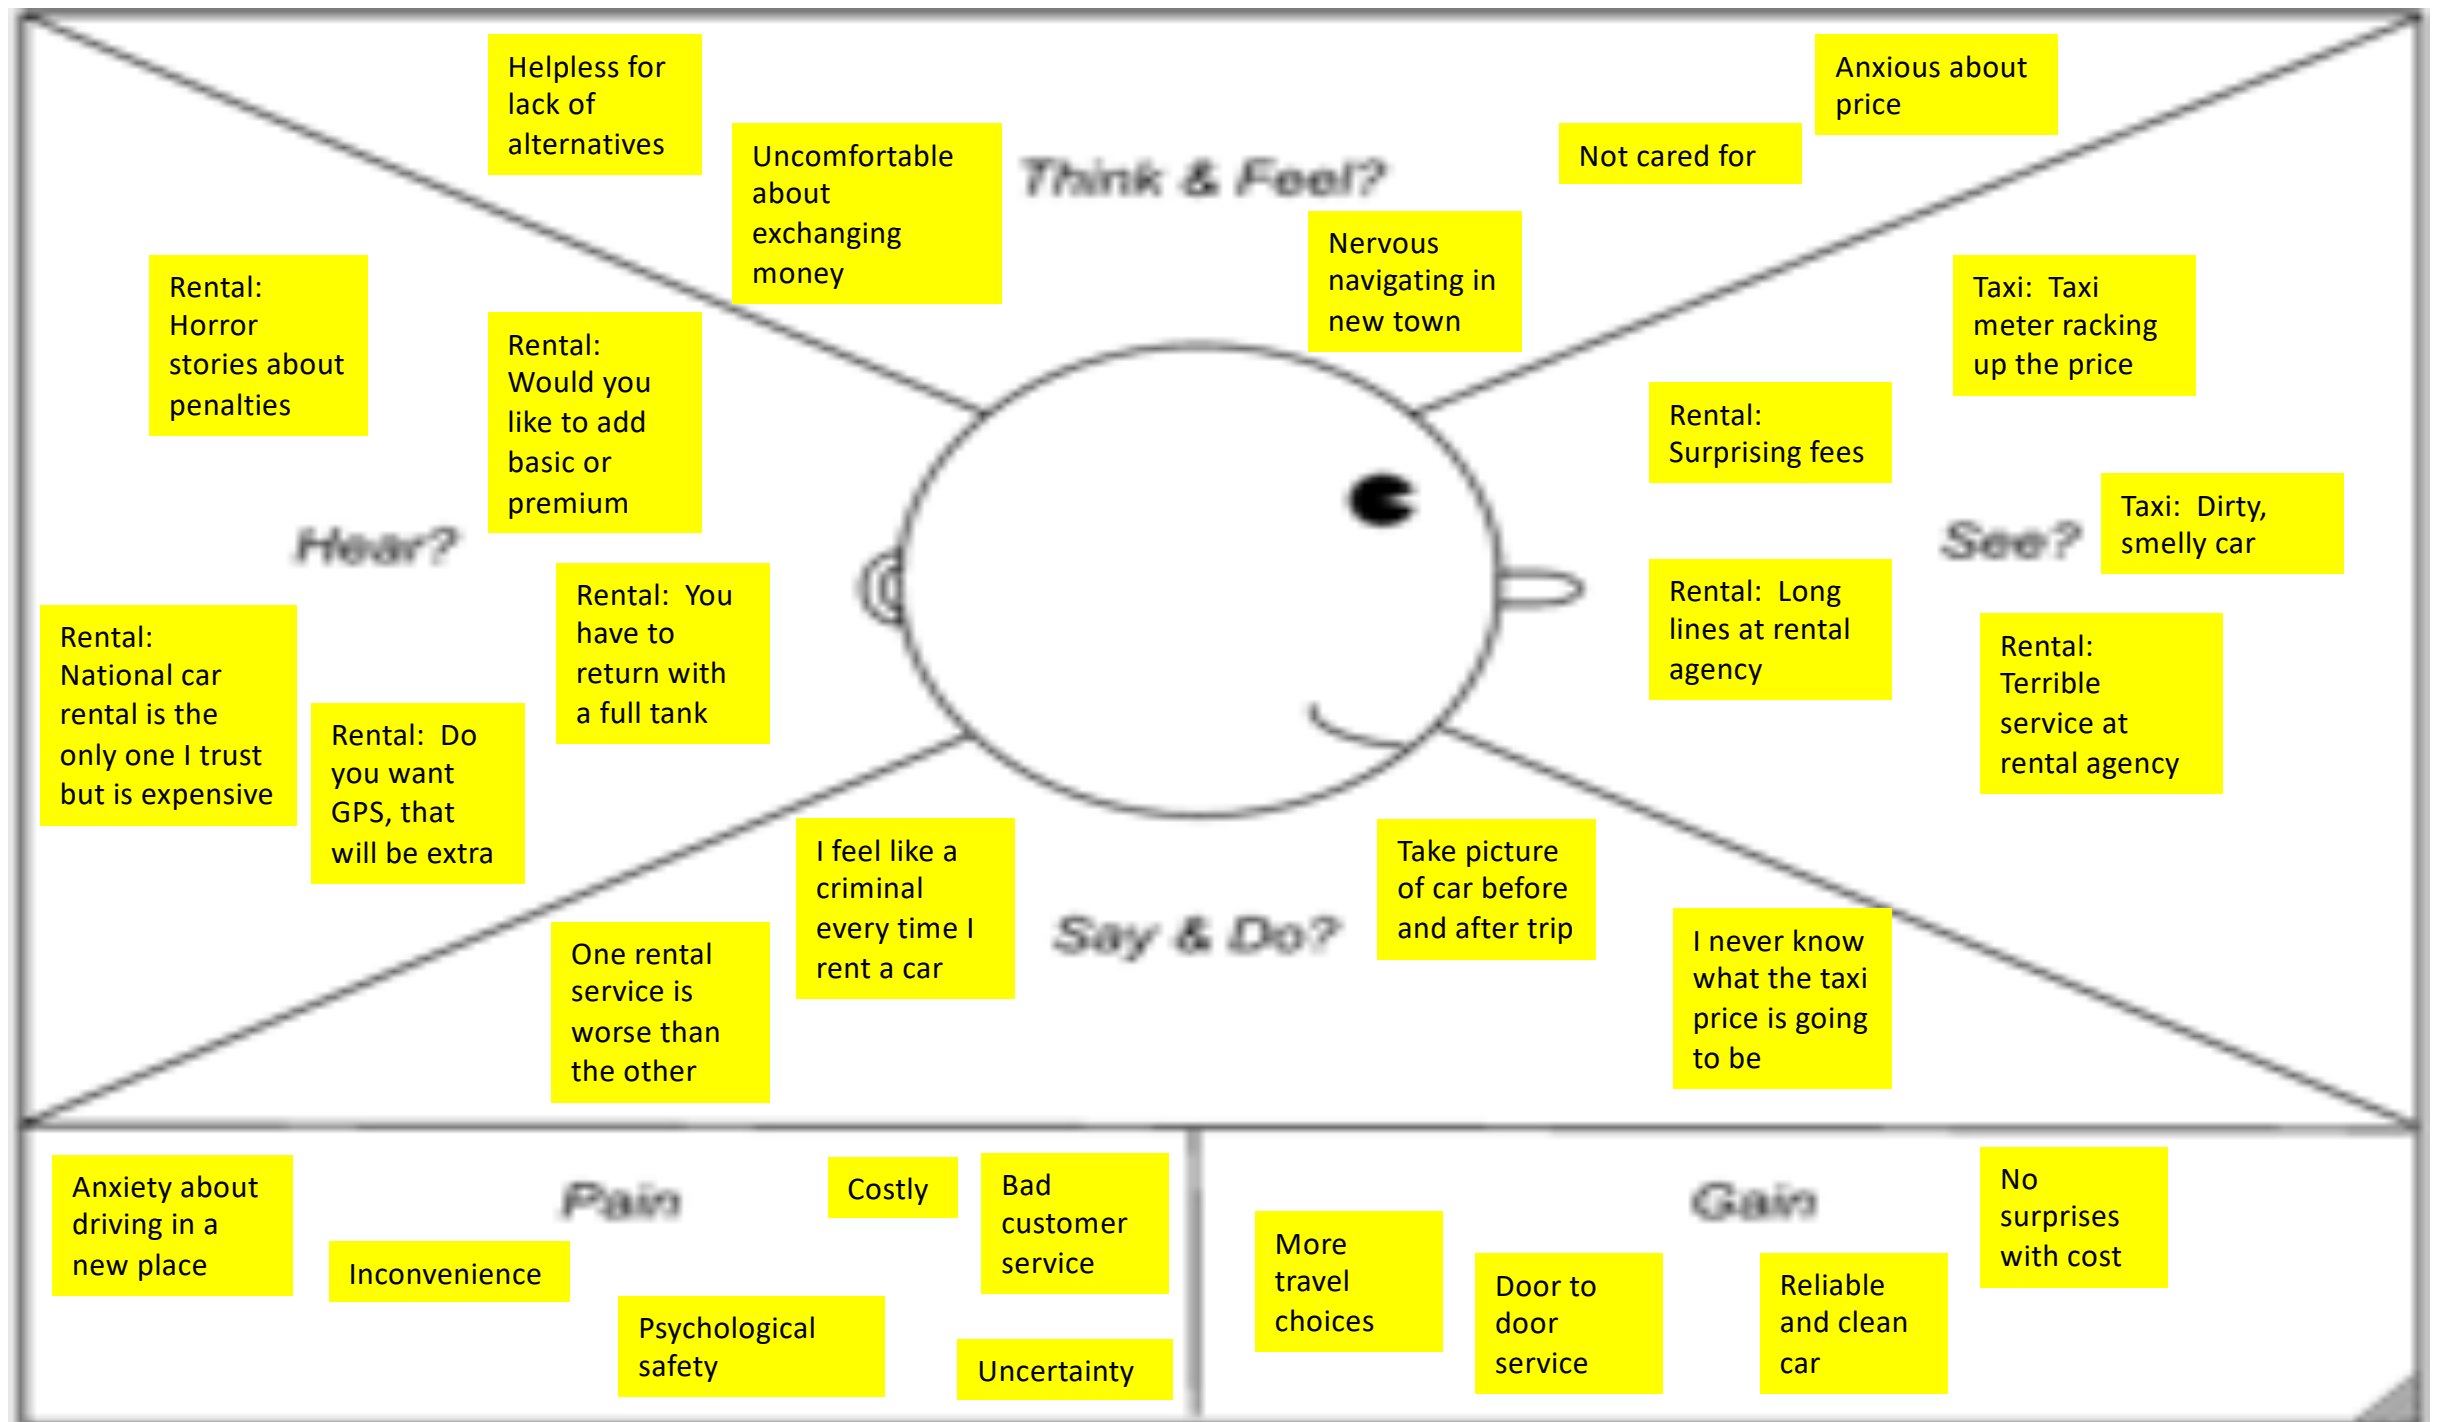

Empathy Map

Put yourself in your user or customer's shoes..

- 1. Think and feel:** What really matters to the user? What are their worries and aspirations?
- 2. Hear:** What would their friends, colleagues, and influencers saying that impact the user's thinking?
- 3. See:** What is the user seeing that might influence his/her decisions? What competitive products? What friends are using?
- 4. Say & Do:** What is the user saying or doing while using the product? Is that different in a public or private setting?
- 5. Pain:** What are their fears, frustrations, anxieties when using your product?
- 6. Gain:** How could they benefit from using your product?

Customer Journey

STAGES	Stage 1	Stage 2	Stage 3	Stage 4	Stage 5	Stage 6	Stage 7
 STEPS							
 FEELINGS 							
 PAIN POINTS							
 OPPORTUNITIES							

Customer Empathy Interview

What are the biggest challenges you face in your role?

What parts of the process would you improve? Why?

How would you describe the process?

What do you and your colleagues wish you had?

How do you solve your challenge now?

Validate The Problem: Customer / Problem Fit

HOW
TO
FIND
PROBLEMS
WORTH
SOLVING

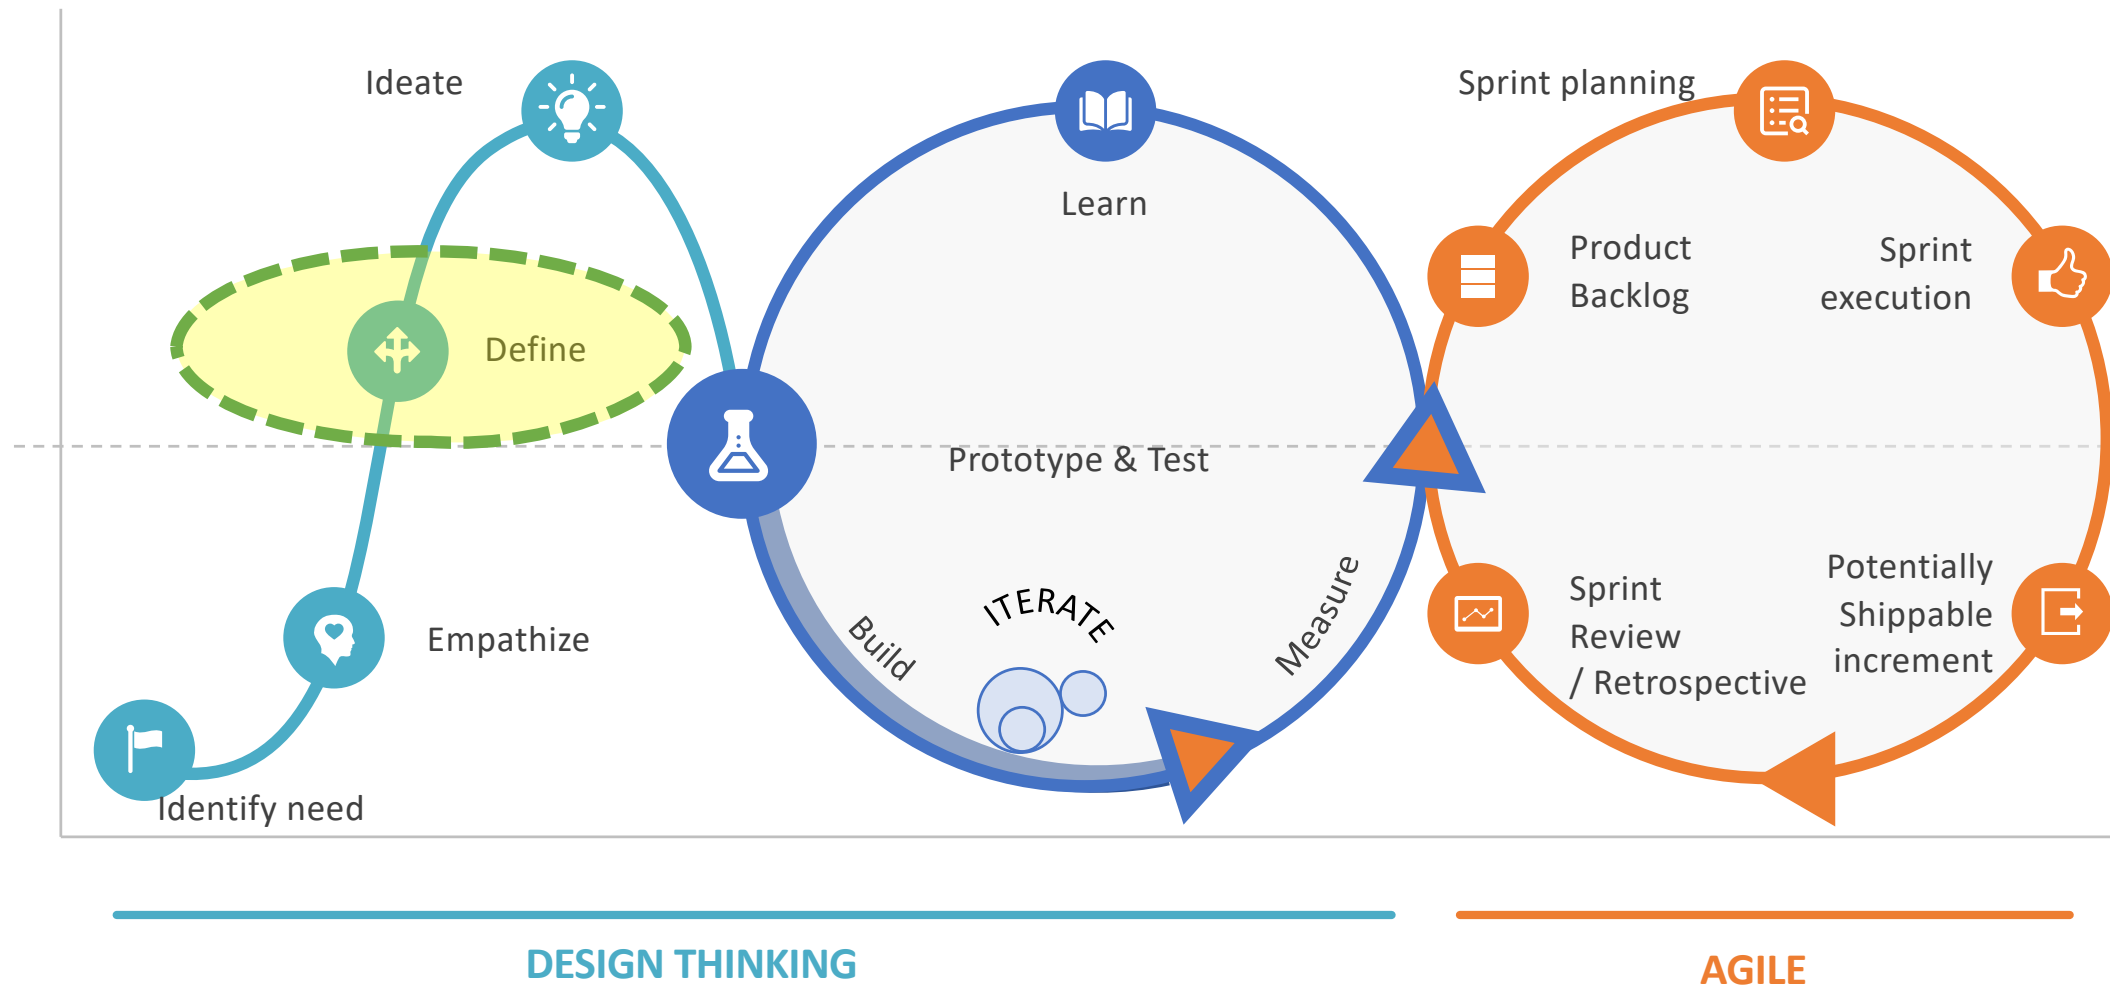

Does the problem exist?

Is the problem worth solving?

How will we know?

- Get out of the building
- Customer Empathy Interviews
- Market Research

Discover, Deliver and Validate Value

Vision

- The north star
- Provides the purpose and motivation when things get tough
- Differentiates you from your competition
- Provides an anchor for creation of goals
- Facilitates collaboration

SHARED VISION

- *Overarching goal.*
- *Ultimate reason for creating the product or service or solution.*
- *Big and inspiring.*

Balancing User Value and Business Needs

Objectives / Business Goals

- ✓ Measurable
- ✓ Timebound
- ✓ Achievable
- ✓ Few and Focused
- ✓ Challenging

- Support the organization's vision and value drivers
- Set strategy and goals for specific amount of time
- Apply to the area for which they are scoped
- Help align organization towards a common goal
- Help employees see how they are contributing to the bigger picture

Examples:

- Reduce conference carbon footprint by 20% by 2021
- Grow revenue by 1 million this quarter
- Grow membership to 200 by Q1 of 2020

THE VISION BOARD

<div> VISION <i>HIGHER PURPOSE or overarching goal, the ultimate reason for creating the product or feature set. Make it big and inspiring.</i></div>			
<div> TARGET GROUP</div> <p><i>WHO does this product, service (or feature set) address?</i></p> <div></div> <p>WHO?</p>	<div> NEEDS</div> <p><i>WHY should/does this product, service (or feature set) exist? Why will someone use or pay for it?</i></p> <div></div> <p>WHY?</p>	<div> PRODUCT / SERVICE</div> <p><i>WHAT is the product, or service (service (or feature set) that addresses the needs?</i></p> <div></div> <p>WHAT?</p>	<div> BUSINESS GOALS</div> <p><i>HOW will we know we are successful?</i></p> <div></div> <p>GOALS?</p>

Tip:
Keep information concise.
Identify your risks and test your assumptions.

Vision Statement – Putting it Together

For *Target Customers*

Who *Statement of Need*

The *Product Name*

Is a *Category*

That *Compelling Reason to Buy & Use*

Unlike *Competition / Alternative*

Our Product *Differentiator*

Example

For *conference attendees*

Who *have the fear of missing out*

The *NoFoMo*

Is a *mobile application*

That *is free, easy to configure and use, and provides a convenient, accurate and up-to-date conference information for staying in the know*

Unlike *other conference apps*

Our Product *provides accurate up to the minute conference updates and allows people to easily connect with fellow attendees*

Framing Problems as Opportunities

IDEO's How Might We method to see a problem

Wicked Questions

Organizational discovery

30 min

Examples

- How is it that we are integrated yet autonomous?
- How is that I am dedicated to work and dedicated to my family simultaneously?
- Global fidelity & consistency vs local adaptation & creativity?

What opposing-yet-complementary strategies do we need to pursue simultaneously in order to be successful?

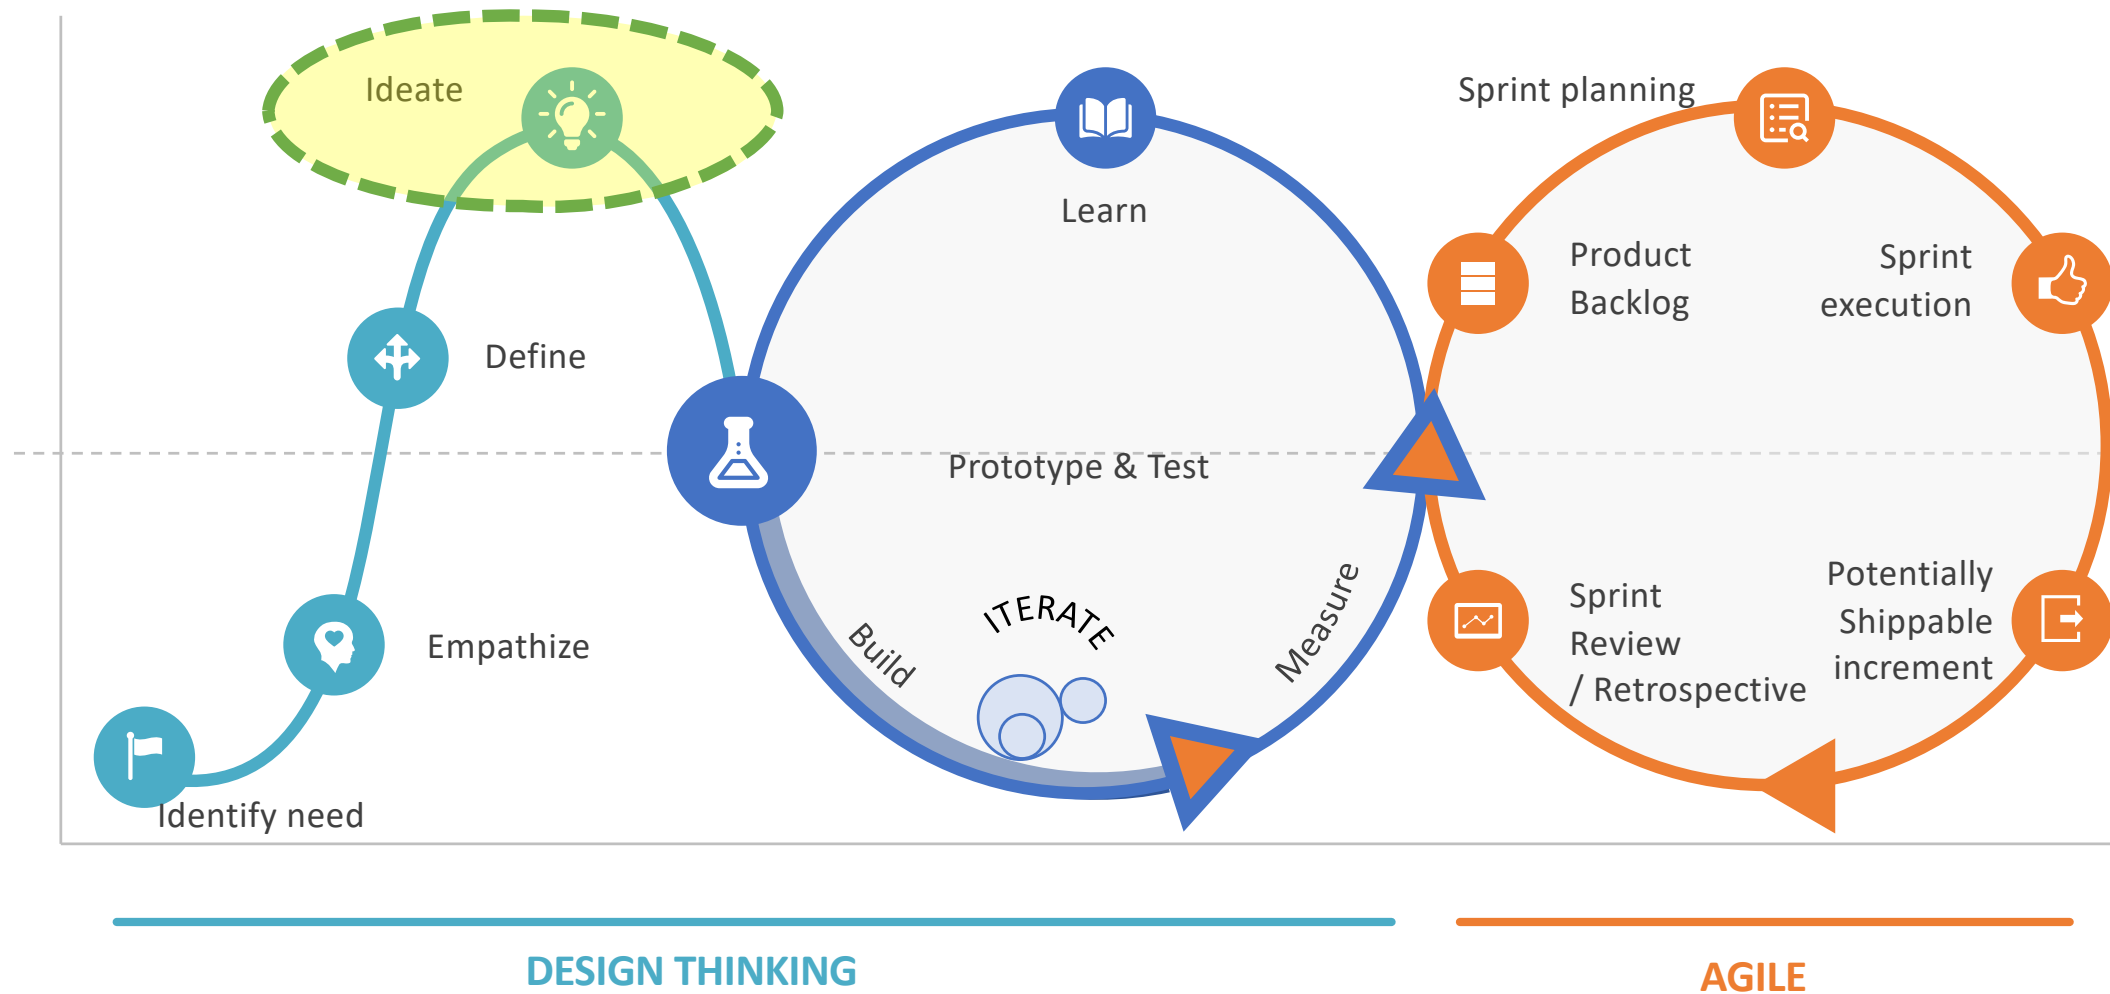

- The opposites and paradoxes: **"How is it that we are ... and we are ... simultaneously?"**
- 1-2-4-All: Individually generate the opposites and **paradoxes** (3 min). Form pairs, compare notes, and generate more. Form a group of four, compare notes, consolidate if necessary, choose one best statement, share with whole group.
- Do more rounds until no more ideas come out.
- What do these statements tell about us? What's amazing? What do we need to work on? How do these statements correlate to the Ecocycle map?

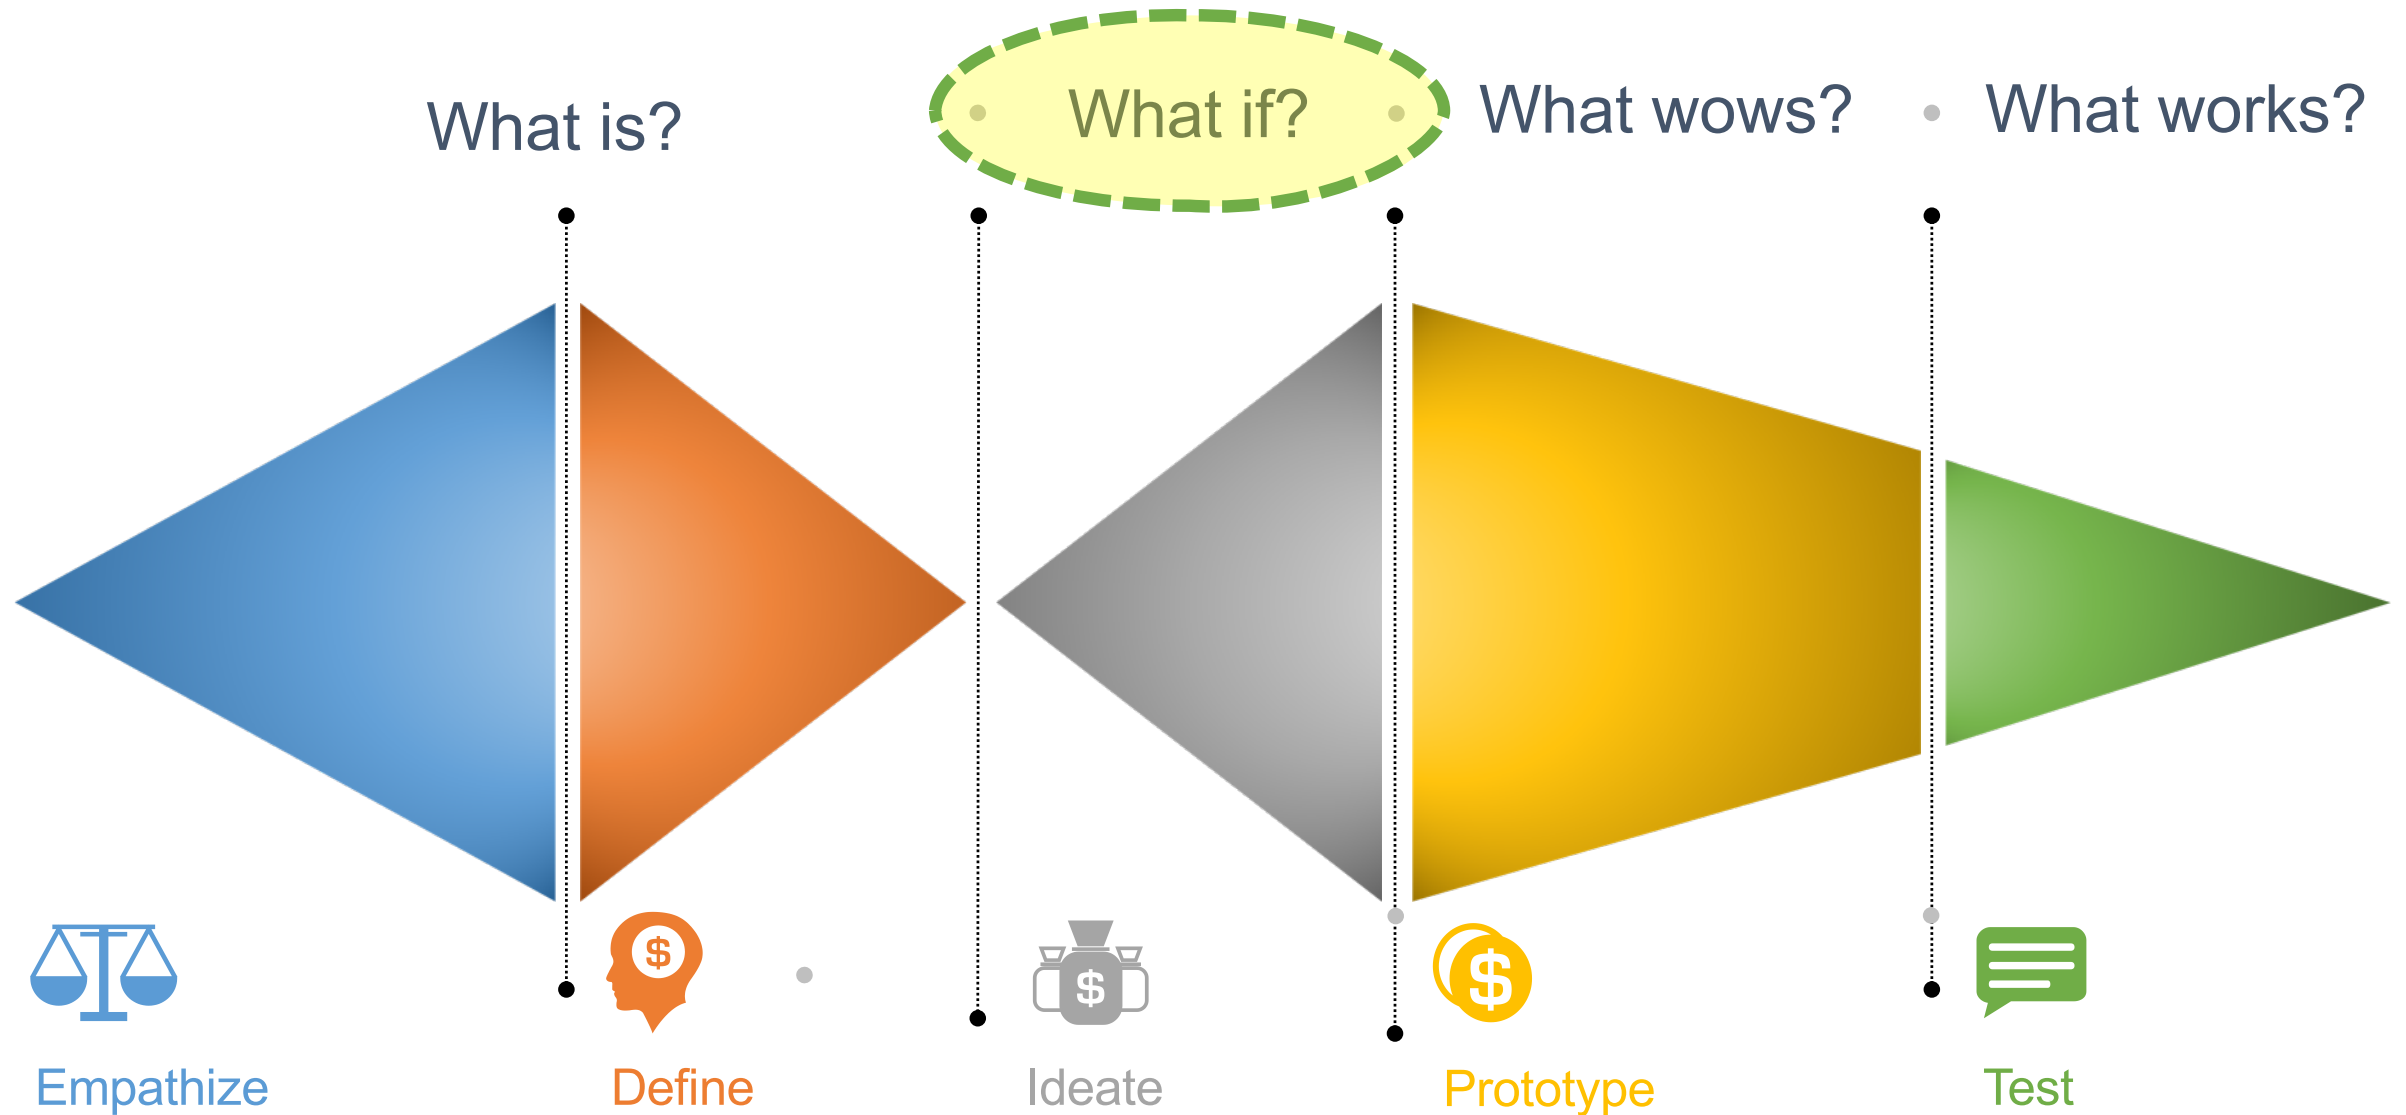

Liberating Structures

Lifecycle

Discover, Deliver and Validate Value

The Design Thinking Framework

Ideate on a Potential Solution

Brainstorming Principles:

- Work within a framework
- Use a time box
- Assemble a diverse group
- Clearly articulate problem to be solved
- All ideas are welcome. No judgement
- Capture all ideas
- Build off each other's ideas
- Don't strive for perfection
- Stay focused. Park ideas outside scope
- Diverge before converging

Opportunity / Solution Tree

What is the desired outcome that will create value for our customers?

Qualitative Objective, Quantitative Measure (OKRs)

What are opportunities that achieve the desired outcome?

Frame the problem / opportunity.

What are the solutions that solve the problem or address the opportunity?

Is the solution viable?

“The WoW” Solution
